

Oil and Natural Gas Production (ONGP) Health Concerns

ONGP in Pennsylvania

ONGP is a significant industry in Pennsylvania. The latest wave of ONGP activity in the state began in 2005 with the start of unconventional oil and natural gas development (UONGD). Unconventional wells are distinct from conventional wells due to the geologic formation being tapped. They use horizontal and vertical drilling as well as hydraulic fracturing (“fracking”) to access once unavailable reservoirs of oil and natural gas.

As of June 30, 2021, the Pennsylvania Department of Environmental Protection (DEP) reported there were 11,548 active unconventional wells in the state. Thirty-five of Pennsylvania’s 67 counties had active unconventional wells, with Washington (1,877), Susquehanna (1,756), and Greene (1,472) counties having the greatest numbers of active unconventional wells.*

ONGP Health Registry

In response to growing concerns about UONGD, the Pennsylvania Department of Health (DOH) developed a confidential health registry to better track and respond to public health complaints related to ONGP.

As of June 30, 2021, DOH received 180 ONGP-related health complaints, with Washington (45), Susquehanna (37), and Bradford (23) counties having the most health complaints. Three complaints were received in Quarter 2 2021.

Demographic Summary

This table summarizes the demographic and health insurance information of individuals included in the formal health complaints received for Q2 2021, YTD 2021, and total since 2011. This does not necessarily reflect the demographic characteristics of the entire community.

*Table excludes general inquiries, news updates and information sharing complaints. Each health complaint may pertain to more than one individual. Race/ethnicity, age, and health insurance were not systematically collected until March 2017. Percentages within each group may not sum to 100% due to rounding.

Symptom Summary

This table summarizes the symptoms reported by individuals for Q2 2021, YTD 2021, and total since 2011.

*Table excludes general inquiries, news updates and information sharing complaints. Each health complaint may pertain to more than one individual.

^aIncludes sleep disturbance, fatigue, fever, chills, night sweats, shaking, weight loss/gain, decreased appetite, muscle aches/cramps, joint pain, fainting, and swelling

[†]Numbers in parentheses correspond to newly diagnosed conditions relevant to that symptom group: heart disease and/or hypertension (cardiovascular group), neurological disease (neurological), psychological disease (psychological), asthma or COPD (respiratory), kidney disease or failure (urogenital). They do not represent pre-existing conditions. Therefore, someone could report that UONGD exacerbated their asthma (noted in the respiratory count) but was diagnosed before UONGD activity started in their area (not reflected in number of parentheses).

Health Overview 2021 Year-to-Date Based on Formal Health Complaints (N=6 complaints, 15 individuals)

- Individuals who reported being in poor or fair health: 20% (additionally, one individual is deceased)
- Individuals who reported being disabled: 0%
- Individuals who reported being diagnosed with cancer since the beginning of 2021: 13%
- Individuals who visited the doctor for their health concerns: 53%
- Two (33%) of 2021 YTD complaint cases had concerns about animal health (livestock or pets).

Figure 3. Total Number of Active Oil and Natural Gas Wells in Pennsylvania, 2012 to 2020

The tables below show data for counties with more than 500 active unconventional oil and natural gas wells as of June 30, 2021.

Washington (1,877) Susquehanna (1,756) Greene (1,472)
Bradford (1,456) Lycoming (962) Tioga (794) Butler (596)

Respiratory	41	30	12	16	4	6	2
Urogenital	6	12	2	4	3	0	1
Missing	16	2	3	8	0	0	1

County-specific numbers of individuals are as follows: 73 (Washington), 70 (Susquehanna), 20 (Greene), 35 (Bradford), 8 (Lycoming), 14 (Tioga), and 5 (Butler).

^aIncludes sleep disturbance, fatigue, fever, chills, night sweats, shaking, weight loss/gain, decreased appetite, muscle aches/cramps, joint pain, fainting, and swelling

By far, most oil and natural gas-related complaints received by DOH have been related to UONGD. We have received four complaints related to conventional oil and natural gas development since 2011. Symptoms are self-reported and are not clinically verified. Symptoms reported are general in nature and cannot specifically be attributed to ONGP.
