

# Looking for a Few Good Doctors

If you are a doctor certified in family medicine, internal medicine, or primary care, the Pennsylvania Department of Health wants you. The Tuberculosis Control Program (TBCP) within the Bureau of Communicable Diseases is seeking physicians to provide clinical and consultative services on an as-needed basis for patients known or suspected of having tuberculosis.

The need for services is currently greatest in Berks, Schuylkill and Butler counties, but the TBCP is interested in expanding its network of physicians in all Pennsylvania counties.

Physicians will be required to provide services in accordance with the tuberculosis treatment guidelines advocated by the American Thoracic Society and the U.S. Centers for Disease Control and Prevention. For more information, call 717-787-6267.
