COMMONWEALTH OF PENNSYLVANIA
DEPARTMENT OF HEALTH

A letter from the Secretary:

I am pleased to introduce the 2013 Pennsylvania State Health Assessment. This comprehensive assessment of the health of Pennsylvanians provides readers with current information that has been compiled collaboratively with public health partners across the state.

The assessment provides a “one-stop” summary of information on health status, health risks and healthcare services in Pennsylvania. Included are regional and statewide health statistics and information showing the impact age, sex, race and ethnicity have on health. There are 10 major topics and 73 sub-topics. Most sections of the report include information on how the state is currently working to address each topic and where the reader can turn for additional information.

This assessment of the commonwealth’s health will serve as a resource for many organizations in developing priorities and plans to improve population health. It also serves as a prerequisite for the department as we continue to prepare for accreditation by the Public Health Accreditation Board.

I sincerely thank the eight state agencies, 41 organizations, and over 140 individuals who contributed time and expertise to this important work. I look forward to continued partnership with you in the future.

A handwritten signature in black ink that reads "Michael Wolf".

Michael Wolf
