

WEEKLY REPORT FOR DEATHS ATTRIBUTED TO COVID-19 ISSUED JULY 3, 2020

DEATHS REGISTERED: 6,746

This report is based on COVID-19 deaths that occurred in Pennsylvania. This information has been extracted from death records registered with the Department's Vital Records Program as of 11:59 pm on July 2, 2020. Please see [State Registrar Notice \(SRN\) 2020-13](#) for detailed information regarding the reporting of these deaths. These deaths meet the CDC's National Center for Health Statistics guidance.¹ Death records included in this report include laboratory confirmed COVID-19 deaths and clinically confirmed COVID-19 deaths.²

This death data information is considered provisional information. Due to the time associated with reporting deaths, recent death data is incomplete and only reflected in the figures below if the death record is complete. Death data will continue to be updated as additional COVID-19 deaths are registered and amended with the Vital Records Program.

COMORBIDITIES

Due to the novel nature of COVID-19, this is a list of comorbidities currently being tracked in Pennsylvania. This subset of comorbidities should not be interpreted as a list of conditions that caused an individual to be more susceptible to the disease. Since an individual may have multiple comorbidities, this count is not mutually exclusive. For instance, a decedent with hypertension and diabetes will be counted in both comorbidity types.

At the time of this reporting, approximately 37% of death records did not include comorbidity data. While medical certifiers are encouraged to include comorbidities that significantly contributed to the death, medical certifiers often underreport comorbidity data.
