COMORBIDITIES

Due to the novel nature of COVID-19, this is a list of comorbidities currently being tracked in Pennsylvania. This subset of comorbidities should not be interpreted as a list of conditions that caused an individual to be more susceptible to the disease. Since an individual may have multiple comorbidities, this count is not mutually exclusive. For instance, a decedent with hypertension and diabetes will be counted in both comorbidity types.

At the time of this reporting, approximately 37% of death records did not include comorbidity data. While medical certifiers are encouraged to include comorbidities that significantly contributed to the death, medical certifiers often underreport comorbidity data.
