

EMS Information Bulletin 2023-22

DATE: December 15, 2023

SUBJECT: Agency email domain restrictions reminder for biospatial access

TO: All EMS Agencies
Regional EMS Councils

FROM: Lori A. Driscoll, EMS Program Specialist *Lori A. Driscoll*
Licensure and Regulatory Compliance
Bureau of Emergency Medical Services
(717) 787-8740

This is a reminder of EMS Information Bulletin 2023-13 Agency Email Domains for biospatial and EMS Information Bulletin 2023-20 Agency Email Domain Change Reminder for biospatial access.

Domain name restrictions will begin on January 1, 2024.

The Pennsylvania Department of Health (Department), Bureau of EMS (Bureau) participates in the National EMS Information System (NEMSIS) which is a standardized national database, a program within the NHTSA Office of EMS. Information is submitted to the national database via the electronic patient care reports that EMS providers complete after providing patient care.

In 2023, the Bureau transitioned to biospatial, a database repository vendor. With this transition, the Bureau opted to allow Pennsylvania EMS agencies access to their data in biospatial for quality assurance and quality improvement purposes.

To ensure and increase the security of information that EMS agencies have access to in biospatial, beginning January 1, 2024, email addresses tied to a biospatial account must have a business or agency email domain such as @anyemsagency.com or @youremsagency.org. Accordingly, the Department will no longer accept or authorize a user to have access to biospatial whose email address comes from a personal domain such as @gmail.com, @outlook.com, @yahoo.com, etc. Further, this email address should not be a general shared email account. A shared email would be an account that the username and password is shared with other users to give them access to the same account. The user's email account must be an individual email account to have access to biospatial. The email addresses must include the user's name (examples johnsmith@anyagencyname.com or jlsmith@anyagencyname.org).

What does this mean? First, it is important to remember that your EMS agency is **NOT** required to have an account for biospatial for quality assurance and quality improvement purposes. This is a tool the Bureau believes is beneficial to your EMS agency. If you would like to access your ePCR data for building quality assurance and quality improvement reports, your agency will now need to use a customized domain.

There are various resources available at a relatively low cost to create your own agency domain name for email. In some cases, your agency may already have a website and could explore with the website host the cost for branded emails. Below are resources you may find helpful.

If your agency would like to continue to have access to biospatial reports and you do not have a domain name established, please begin that process as soon as possible. If your agency already has an established domain name that is assigned to a specific individual, no further action is required.

Once you have the domain name established and have new email account, please provide up to two (2) emails per agency to lodriscoll@pa.gov. This information must be provided by the agency manager and/or president. Once added to biospatial, these users will then have access to the agency's data.

After January 1, 2024, all accounts that have been established utilizing the "generic" domains will be deleted.

If you have any questions, please contact me at lodriscoll@pa.gov.
