

Oil and Natural Gas Production (ONGP) Health Concerns

ONGP in Pennsylvania

ONGP is a significant industry in Pennsylvania. The latest wave of ONGP activity in the state began in 2005 with the start of unconventional oil and natural gas development (UONGD). Unconventional wells are distinct from conventional wells by the geologic formation being tapped. They use horizontal and vertical drilling and hydraulic fracturing ("fracking") to access traditionally unavailable reservoirs of oil and natural gas.

As of April 30, 2018, the Pennsylvania Department of Environmental Protection (DEP) reported there were 9,714 active unconventional wells in the state. Thirty-four of Pennsylvania's 67 counties had active unconventional wells, with Washington (1,607), Susquehanna (1,383) and Greene (1,206) counties having the greatest numbers of active unconventional wells.*

ONGP Health Registry

In response to growing concerns about UONGD, the Pennsylvania Department of Health (DOH) developed a confidential health registry to better track and respond to public health complaints related to ONGP.

As of April 30, 2018, DOH received 140 ONGP-related health complaints, with Washington (37), Susquehanna (26) and Bradford (21) counties having the most health complaints.

^aIncludes sleep disturbance, fatigue, fever, chills, night sweats, shaking, weight loss/gain, decreased appetite, muscle aches/cramps, joint pain, fainting and swelling

[†]Numbers in parentheses correspond to newly diagnosed conditions relevant to that symptom group: heart disease and/or hypertension (cardiovascular group), neurological disease (neurological), psychological disease (psychological), asthma or COPD (respiratory), kidney disease or failure (urogenital). They do not represent pre-existing conditions. Therefore, someone could report that UONGD exacerbated their asthma (noted in the respiratory count) but was diagnosed before UONGD activity started in their area (not reflected in number of parentheses).

Health Overview 2018 Year-to-Date based on Formal Health Complaints (N=1 complaints, 2 individuals)

- ☐ 0% of individuals reported being in poor or fair health.
- ☐ 0% of individuals reported being disabled.
- ☐ 0% of individuals reported being diagnosed with cancer since 2011.
- ☐ 100% of individuals visited the doctor for their health concerns.
- ☐ One (100%) 2018 YTD complaint case had concerns about animal health (livestock or pets).

The following charts show data for counties that have more than 500 active unconventional oil and natural gas wells. As of April 30, 2018, seven counties had more than 500 active unconventional wells (exact number of wells in parentheses):

Washington (1,607) Susquehanna (1,383) Greene (1,206)
Bradford (1,185) Lycoming (853) Tioga (725) Butler (520)

County-specific numbers of individuals are as follows: 62 (Washington), 52 (Susquehanna), 12 (Greene), 33 (Bradford), 7 (Lycoming), 2 (Tioga) and 5 (Butler).

^aIncludes sleep disturbance, fatigue, fever, chills, night sweats, shaking, weight loss/gain, decreased appetite, muscle aches/cramps, joint pain, fainting and swelling

By far, the majority of complaints received by DOH has been related to unconventional oil and natural gas development. We have received two complaints related to conventional oil and natural gas development.
