

Oil and Natural Gas Production (ONGP) Health Concerns

ONGP in Pennsylvania

ONGP is a significant industry in Pennsylvania. The latest wave of ONGP activity in the state began in 2005 with the start of unconventional oil and natural gas development (UONGD). Unconventional wells are distinct from conventional wells by the geologic formation being tapped. They use horizontal and vertical drilling and hydraulic fracturing (“fracking”) to access traditionally unavailable reservoirs of oil and natural gas.

As of Sept. 30, 2018, the Pennsylvania Department of Environmental Protection (DEP) reported there were 10,044 active unconventional wells in the state. Thirty-four of Pennsylvania’s 67 counties had active unconventional wells, with Washington (1,654), Susquehanna (1,458) and Greene (1,256) counties having the greatest numbers of active unconventional wells.*

ONGP Health Registry

In response to growing concerns about UONGD, the Pennsylvania Department of Health (DOH) developed a confidential health registry to better track and respond to public health complaints related to ONGP.

As of Sept. 30, 2018, DOH received 146 ONGP-related health complaints, with Washington (38), Susquehanna (27) and Bradford (21) counties having the most health complaints.

Referrals

Thirty-three % of Q3 2018 health complaints were referred by ATSDR, EPA or another federal agency.

Thirty-three % of Q3 2018 health complaints were referred by DEP.

Demographic Summary

This table summarizes the demographic and health insurance information of individuals included in the formal health complaints received for Q3 2018, YTD 2018 and total since 2011. This does not necessarily reflect the demographic characteristics of the entire community.

*Table excludes general inquiries, news updates and information sharing complaints. Each health complaint may pertain to more than one individual.

Race/ethnicity, age and health insurance were not systematically collected until March 2017. Percentages within each group may not sum to 100% due to rounding.

Symptom Summary

This table summarizes the symptoms reported by individuals for Q3 2018, YTD 2018 and total since 2011.

*Table excludes general inquiries, news updates and information sharing complaints. Each health complaint may pertain to more than one individual.

^aIncludes sleep disturbance, fatigue, fever, chills, night sweats, shaking, weight loss/gain, decreased appetite, muscle aches/cramps, joint pain, fainting and swelling

[†]Numbers in parentheses correspond to newly diagnosed conditions relevant to that symptom group: heart disease and/or hypertension (cardiovascular group), neurological disease (neurological), psychological disease (psychological), asthma or COPD (respiratory), kidney disease or failure (urogenital). They do not represent pre-existing conditions. Therefore, someone could report that UONGD exacerbated their asthma (noted in the respiratory count) but was diagnosed before UONGD activity started in their area (not reflected in number of parentheses).

Health Overview 2018 Year-to-Date based on Formal Health Complaints (N=8 complaints, 15 individuals)

- 40% of individuals reported being in poor or fair health.
- 27% of individuals reported being disabled.
- 33% of individuals reported being diagnosed with cancer since 2011.
- 80% of individuals visited the doctor for their health concerns.
- Three (20%) of 2018 YTD complaint cases had concerns about animal health (livestock or pets).

The following charts show data for counties that have more than 500 active unconventional oil and natural gas wells. As of Sept. 30, 2018, seven counties had more than 500 active unconventional wells (exact number of wells in parentheses):

Washington (1,654) Susquehanna (1,458) Greene (1,256)
Bradford (1,237) Lycoming (853) Tioga (741) Butler (527)

Table 5. Environmental Source of Concern by County (All Complaints since 2011)

Source	Washington	Susquehanna	Greene	Bradford	Lycoming	Tioga	Butler

Respiratory	37	28	10	15	3	1	2
Urogenital	6	6	1	4	3	0	1
Missing	16	2	3	8	0	0	1

County-specific numbers of individuals are as follows: 63 (Washington), 54 (Susquehanna), 15 (Greene), 33 (Bradford), 7 (Lycoming), 2 (Tioga) and 5 (Butler).

^aIncludes sleep disturbance, fatigue, fever, chills, night sweats, shaking, weight loss/gain, decreased appetite, muscle aches/cramps, joint pain, fainting and swelling

By far, most oil and natural gas-related complaints received by DOH have been related to unconventional oil and natural gas development. We have received three complaints related to conventional oil and natural gas development since 2011.
