

INSTALL ALARMS TO KEEP YOU SAFE FROM HARM!

SMOKE ALARMS & CARBON MONOXIDE DETECTORS SAVE LIVES.

Exposure to fire smoke and carbon monoxide (CO) can threaten you and your family's health. You cannot see, taste, or smell CO. The **only way to detect CO is with a CO detector.**

Smoke alarms and CO detectors are affordable and effective. Install one on each level of your home and in every sleeping room. Replace batteries every six months.

Get a free smoke alarm from the American Red Cross Greater PA Home Fire Campaign. Buy a CO detector at your local hardware store for \$15 to \$30.

What is CO?

CO is a poisonous gas produced by burning fuel.

What causes CO poisoning?

Malfunctioning fuel-burning appliances, especially poorly ventilated ones, are often the cause of CO poisoning. Examples include clothes dryers, gas-burning stoves, and generators.

Other causes of CO poisoning are running a car inside a garage and smoking tobacco (especially through a hookah).

How does CO affect children's health?

CO can harm the brain, heart, & other organs. It can be deadly.

What are the symptoms of CO poisoning?

Symptoms of CO poisoning could include headache, dizziness, weakness, upset stomach, vomiting, chest pain, and confusion.
