[SOM - Appendix PP \(cms.gov\)](#)

§ 201.1. Applicability.

This subpart applies to long-term care nursing facilities as defined in section 802.1 of the act (35 P.S. § 448.802a).

§ 201.2. Requirements.

(a) The Department incorporates by reference 42 CFR Part 483, Subpart B of the Federal requirements for long-term care facilities (relating to requirements for long-term care facilities), as licensing regulations for long-term care nursing facilities with the exception of 42 CFR 483.1 (relating to basis and scope) and the requirements under 42 CFR Part 483 Subpart B for the transmission of data and minimum data set (MDS) reporting to the Centers for Medicare & Medicaid Services (CMS) unless the facility is participating in the Medicare or Medical Assistance program.

Interpretive Guidelines

Licensed only facilities, which are facilities that do not participate in Medicare/Medicaid, do not have to submit MDS's for reimbursement.

CMS has authority to collect MDS data for residents who are on a Medicare and/or Medicaid certified unit. [Item A0410 captures the certification designation, and QIES will reject records that CMS is not authorized to collect.]

Assessments that are completed for purposes other than OBRA and SNF PPS reasons are not to be submitted to CMS through the QIES system. [from RAI Manual Chapter 5]

§ 201.13b. Provisional license.

(a) Under section 812 of the Act (35 P.S. § 448.812), the Department may issue a provisional license if there are numerous deficiencies or a serious specific deficiency and the facility is not in substantial compliance with this subpart and the Department finds that:

(1) The facility is taking appropriate steps to correct the deficiencies in accordance with a timetable submitted by the facility and agreed upon by the Department.

(2) There is no cyclical pattern of deficiencies over a period of 2 or more years.

(b) A provisional license will be issued for a specified time period of no more than 6 months.

(c) Upon a determination of substantial compliance, including the payment of any fines and fees, a regular license will be issued.

Upon request, the facility shall make the most recent report available to interested persons.

The facility is responsible for returning the property and can do this however it chooses. If a family does not want the property, the facility should have instructions in writing from the family for the distribution of that personal property, e.g., an email that says to donate the clothing to Goodwill. A documented phone call with the facility social worker and the family would also meet this requirement. Minimum documentation of the call would include date, time and those on the call.

(3) The general operation of the facility.

(c) The governing body shall report to the Department within 30 days changes to the information that was submitted with the facility's application for licensure under § 201.12(b)(1) — § 201.12(b)(6) (relating to application for license of a new facility or change in ownership).

(d.1) The administrator appointed by the governing body under 42 CFR 483.70(d)(2) shall be currently licensed and registered in this Commonwealth and shall be employed full-time in facilities that have more than 25 beds. Facilities with 25 beds or less may share an administrator provided that all of the following apply:

(1) The Department is informed of this arrangement.

(2) There is a plan in the event of an emergency when the administrator is not working.

(4) The director of nursing services has, at a minimum, knowledge and experience of the facility, its policies and procedures and resident needs to compensate for the time the administrator is not in the building.

Interpretive Guidelines

The facility will need to provide evidence that the DON has knowledge and experience as noted in (4). Examples of evidence include a resume, performance standards and evaluations, or a letter from the Medical Director.

(5) The sharing of an administrator shall be limited to two facilities.

(d.2) The administrator's anticipated biweekly work schedule shall be publicly posted in the facility. The anticipated work schedule shall be updated within 24 hours of a change.

(3) Maintaining an ongoing relationship with the governing body, medical and nursing staff and other professional and supervisory staff through meetings and reports, occurring as often as necessary, but at least on a monthly basis.

Interpretive Guidelines:

Meetings and reports must occur at least on a monthly basis if the facility deems more often can hold additional meetings.

Virtual meetings do count as a monthly meeting. The minutes/notes from meetings will be accepted as monthly report.

(4) Studying and acting upon recommendations made by committees.

(5) Appointing, in writing and in concurrence with the governing body, a responsible employee to act on the administrator's behalf during temporary absences.

- (d) The director of nursing services shall be responsible for:
 - (1) Standards of accepted nursing practice.

 - (4) Recommendations for the number and levels of nursing services personnel to be employed.

 - (2) Effective July 1, 2023, a minimum of 1 nurse aide per 12 residents during the day, 1 nurse aide per 12 residents during the evening, and 1 nurse aide per 20 residents overnight.
 - (3) Effective July 1, 2024, a minimum of 1 nurse aide per 10 residents during the day, 1 nurse aide per 11 residents during the evening, and 1 nurse aide per 15 residents overnight.

DISCLAIMER: This document was created utilizing the text of the regulations that was published in the *Pennsylvania Bulletin* on December 24, 2022, and may differ slightly in format and style from the official version of the regulations that have been published in the *Pennsylvania Code*.

(ii) A facility with a census of 59 or under may substitute an LPN for an RN on the overnight shift only if an RN is on call and located within a 30-minute drive of the facility.

(g) [Reserved].

(h) [Reserved].

Interpretive Guidelines:

Compliance with staffing ratios will be measured as full-time equivalents (FTE).

A full-time equivalent is determined by the number of hours in an 8-hour shift multiplied by the census for that shift. For example, if there are 30 residents, the full-time equivalent requirement would be 30 divided by 12 resulting in 2.5 FTE required as minimum nurse aides for the morning shift. 2.5 FTE equates to 20 staff hours. The total number of hours worked by a nurse aide must equal or exceed 20 hours for that shift.

Providers may overlap shifts to meet this requirement but at all times ensure that there are no times during the shift that there is not a nurse aide, LPN or RN on-site adequate to meet the needs of the residents.

If a facility has shifts other than 7.5 or 8, the staff hours will need to be split across shifts to reflect the three shifts designated in the regulations. For example, if the facility uses 12-hour shifts, 8 of the staff hours would apply to the first shift, and the remaining 4 to the second shift.

(i) A minimum number of general nursing care hours shall be provided for each 24-hour period as follows:

(1) Effective July 1, 2023, the total number of hours of general nursing care provided in each 24-hour period shall, when totaled for the entire facility, be a minimum of 2.87 hours of direct resident care for each resident.

(2) Effective July 1, 2024, the total number of hours of general nursing care provided in each 24-hour period shall, when totaled for the entire facility, be a minimum of 3.2 hours of direct resident care for each resident.

(i.1) Only direct resident care provided by nursing service personnel may be counted towards the total number of hours of general nursing care required under subsection (i).

Interpretive Guidelines:

PPD is calculated by adding the total number of staff hours for the 24-hour period and dividing by the number of residents.

There are some staff that might be considered nursing personnel, but do not count toward the total PPD. Examples of staff that do not count include orientees, light duty nursing staff, RNAC's, hospice staff, private caregivers, feeding assistants, student nurses, and unit clerks (even if they are nurse aides).

DISCLAIMER: This document was created utilizing the text of the regulations that was published in the *Pennsylvania Bulletin* on December 24, 2022, and may differ slightly in format and style from the official version of the regulations that have been published in the *Pennsylvania Code*.

Examples of personnel that can be counted include:

- Light duty nursing staff if they are providing direct care such as nail care, feeding or 1:1.
- Lunch times can be counted if “on duty” (physically present & able to personally provide nursing care when needed).

Nursing staff that accompany residents on appointments should be counted.

Nursing managers who do not normally perform direct care but are needed because of call offs should keep a record of tasks performed for that given day and the amount of time spent performing those tasks as proof of the hours worked. Those recorded hours may be counted towards the minimum hours PPD for that day.
