

Pennsylvania Report on Untested Sexual Assault
Kits and Backlogged Evidence

April 2018

The Sexual Assault Testing and Evidence Collection Act (SATEC) was amended on July 10, 2015, with the passage of Act 27. Pursuant to Section 10172.3 of SATEC, as amended, local law enforcement agencies¹ were required to submit to the Pennsylvania Department of Health (Department) the number of sexual assault kits in their inventory² with any backlogged evidence awaiting testing,³ as of Dec. 31, 2017. See 35 P.S. §§10172.1 –10172.5. Each testing laboratory used by a local law enforcement agency was required to submit the same information to the Department. See 35 P.S. §§ 10172.3 (d)(2), (e)(2).

¹ A local law enforcement agency is defined as police department, of a city, borough, incorporated town or township, a regional police department, the Pennsylvania State Police or campus police." 35 P.S. 10172.2.

² The SATEC does not define what constitutes inventory for the purpose of submitting data to the Department.

³ SATEC defines backlogged evidence as "[sexual assault evidence that is awaiting testing for 12 months or more." 35 P.S. 10172.2. Evidence is awaiting testing if it meets all the following conditions: "(1) Has been collected and is in the position of a local law enforcement agency; (2) Has not received DNA and other appropriate forensic analyses; (3) Is related to a criminal case or investigation in which final disposition has not been reached; (4) Should undergo DNA or other appropriate forensic analysis as determined by a local law enforcement agency." *Id.* Notably, a case or investigation has reached final disposition if: (1) a conviction or acquittal of all suspected perpetrators of the crime involved has occurred; (2) a local law enforcement agency in possession of the sexual assault evidence has determined that the case is unfounded; or (3) a declaration is made by the victim that a sexual assault has, in fact, not occurred. *Id.*

In addition to submitting backlogged evidence, local law enforcement agencies were asked to submit the number of rape kits: (1) from victims who had not consented to testing and (2) from anonymous victims. This data was not required to be reported but was intended to assist law enforcement in determining how to categorize the kits in their possession.

Every year, by April 30, the Department is required to compile the submitted data and publish a report summarizing the information submitted by the local law enforcement agencies. See 35 P.S. 10172.3(e)(3). The Department's annual report — one of among many of Act 27's fundamental changes — is intended to provide a comprehensive view of the number of untested sexual assault kits in the commonwealth and to ensure that those kits are tested in a timely fashion. This, in part, will ensure that sexual assault data is uploaded into the requisite federal database to help solve related sexual assault cases.

In an effort to ensure that the Department received accurate and complete information prior to its April 30, 2018 deadline, the Department communicated electronically with local law enforcement agencies regarding the need to file backlogged evidence reports, made the necessary reporting forms available on its website, and published notice of the reporting requirement in the Pennsylvania Bulletin. Additionally, the Department worked with various stakeholders, including the Pennsylvania State Police, the Pennsylvania Coalition Against Rape and the Pennsylvania District Attorneys Association to communicate with local law enforcement agencies about the need to submit their required reports in a timely fashion. In total, 1,037 law enforcement agencies reported results, a 15% increase over the number of reporting agencies from last year's report.

The following table is a summary of the information submitted to the Department for 2017:

| Table 1: Backlogged Rape Kit Inventory | Number |
|--|--------|
| Total sexual assault kits awaiting testing | 929 |
| Backlogged kits in laboratory possession | 689 |
| Reported sexual assault kits from victims who did not consent to testing | 425 |
| Reported sexual assault kits from anonymous victims | 216 |
| Law enforcement agencies who have submitted reports ¹ | 1,037 |

¹ The number of initial and annual reports received reflects the number of local law enforcement agencies submitting a report in each category, respectively. Notably, the Pennsylvania State Police (PSP) provides law enforcement services to a total of 1,698 municipalities (1,287 on a full-time basis and an additional 411 on a part-time basis); PSP's report encompasses all the jurisdictions they service.

Attachment 1 is a summary, produced by the Pennsylvania Collation Against Rape, of the fundamental amendments Act 27 made to the SATEC. It has been attached to aid the reader in understanding the full breadth of changes made by Act 27

Attachment 2 is a list of each local law enforcement agency or university filing a backlogged rape kit inventory report, the number of kits from victims who had not consented to testing, and the number of kits from anonymous victims.

Attachment 1

- Pennsylvania Legislation in 2015: Act 27 -

Sexual Assault Testing & Evidence Collection Act

Effective: September 8, 2015

Brief summary: Requires a comprehensive and precise process for testing of evidence and notification of victims, and qualifies Pennsylvania for federal funding to test backlogged or untested forensic exam kits. Presently the number of untested kits and pieces of evidence is unknown.

Highlights:

- Requires the Department of Health to designate laboratories approved to receive and test sexual assault evidence.
- Directs law enforcement to take possession of evidence within 72 hours of receiving notice from health care facilities.
- Directs local authorities to submit evidence within 15 days to an approved laboratory, which would have to complete testing within six months.
- Mandates annual reports on testing backlogs, and permits authorities to upload testing results into databases to help solve related sexual assault cases.
- Requires notification to victims or surviving family when DNA testing has been completed.
- Allows for kits and evidence to be held for no less than two years if the victim is not ready to move forward with prosecution or has given the evidence anonymously.

- Enables Pennsylvania to apply for “Debbie Smith Act Funding” to improve collection, preservation and testing of evidence.

How this impacts advocates: Advocates can collaborate with law enforcement and prosecution to keep victims informed of timeframes and testing results. Advocates should explain to victims the timeframe in which they have to make a decision to move forward with prosecution if they are unsure about what they wish to do or if the evidence was collected anonymously. The pros and cons of waiting should be discussed with and understood by victims. Advocates should work within the county’s sexual assault response team to make sure victims are provided the option of notification when their kits are reaching the “hold” timeframe deadline.

How this impacts victims: Requires that victims are informed of DNA testing results. Allows victims time to decide about moving forward with evidence testing and investigation. Notification of DNA and evidence testing results may cause additional stress, disruption and traumatic reactions for survivors of sexual assault. A trauma-informed approach is recommended when notifying survivors.
