Overview

The Sexual Assault Testing and Evidence Collection Act (SATEC) was amended by Act 164 of 2018. Act 164 provides a sexual assault evidence collection program that grants responsibilities to the Department of Health (Department) and the Pennsylvania State Police (PSP) to establish civil immunity and provide for rights of sexual assault victims, while giving PSP the task to complete and submit a biannual report to the Department of Health (SATEC Act 164 of 2018). Act 164 was signed by Governor Wolf on Oct. 24, 2018, and went into effect on Dec. 23, 2018 (SATEC Act 164 of 2018).

Act 164 made several changes to the existing version of the SATEC. First, a new statutory provision, 35 P.S. §§ 10172.6, was created that mandated biannual reporting requirements on PSP. The newly created provision within the SATEC requires PSP to make an initial report to the Department by Dec. 31, 2018, and every six months thereafter. The PSP report must include the volume of sexual assault evidence submitted for testing; the volume of sexual assault evidence awaiting testing; rate of submission of sexual assault evidence in compliance with the statute; speed of testing and reason for any delays; and review of current practices, including interagency collaboration with law enforcement and rape crisis centers, in rape kit collection. The report submitted from PSP to the Department is Appendix A of this report.

Additional changes to the SATEC include:

- Establishment of a designated telephone number for health care facilities to call when law enforcement fails to take possession of the kit within 72 hours;
- Health care facilities must notify law enforcement within 12 hours of collecting sexual assault evidence; and
- Testing of evidence must be completed within six months of it being submitted to an approved lab.

Every year by April 30, the Department is required to publish a report summarizing the information submitted by local law enforcement agencies to its website. This annual report is intended to provide a comprehensive overview of the number of untested sexual assault kits in the commonwealth and to ensure that those kits are tested in a timely fashion.

Methods

As mandated by the SATEC, law enforcement agencies were required to report the number of sexual assault kits in their inventory awaiting testing and the number of sexual assault kits in their possession with backlogged evidence awaiting testing as of Dec. 31, 2018. The SATEC defines backlogged evidence as “sexual assault evidence that is awaiting testing for 12 months or more” (35 P.S. 10172.2). Evidence is awaiting testing if it meets all the following conditions:

- Has been collected and is in the possession of a local law enforcement agency;
- Has not received DNA or other appropriate forensic analyses;
- Is related to a criminal case or investigation where final disposition has not been reached; and
- Should undergo DNA or other appropriate forensic analysis as determined by a local law enforcement agency.

Law enforcement agencies were notified by mail and email of the biannual reporting requirements of Act 164 of 2018, as well as the ongoing requirement to report backlogged sexual assault evidence. Additional questions were added to this year’s survey to ensure compliance with Act 164 of 2018.

The survey this year attempted to provide clarity on what would be considered “backlogged sexual assault evidence awaiting testing.” Last year’s survey eliminated the confusion by providing distinct categories for agencies to use to account for the kits in their possession. In addition to the mandated reporting information, this year’s survey asked for the number of sexual assault kits from victims who had not consented to testing; number of sexual assault kits from anonymous victims (Jane Doe kits); and number of sexual assault kits where the assault occurred in an unknown jurisdiction.

Findings

A total of 1,060 law enforcement agencies reported results this year, compared to 1,037 from last year. The agencies, including campus police and approved laboratories, reported 1,101 sexual assault kits awaiting testing at the end of 2018, of which 245 were backlogged. This is a 74 percent decrease in the number of backlogged kits compared to the end of 2017. Most of the kits are in the possession of the laboratories. Police departments are also in possession of 575 kits where the victim did not consent to having the kit tested, 260 kits where the victim was anonymous (Jane Doe kit) and 64 kits where the assault occurred in an unknown jurisdiction.

Table 1 includes an overview of the number of sexual assault kits awaiting testing at the end of 2018, as well as the number of backlogged sexual assault kits and the number of sexual assault kits in laboratory possession. This table also provides a summary of the number of sexual assault kits reported by law enforcement agencies that fell under three other categories.

Table 2 includes an in-depth list of each local law enforcement agency, university or laboratory that reported a backlogged sexual assault kit, the number of kits where the victim did not consent to testing, the number of kits from an anonymous victim (Jane Doe kit) and the number of kits where the assault occurred in an unknown jurisdiction.

Table 1. Number of Sexual Assault Kits

Rape Kit Inventory	Number
Total sexual assault kits awaiting testing at end of 2018	1,101
Number (out of total) that are backlogged	245
Number (out of total) in laboratory possession	782
Number of kits where victim did not consent to testing	575
Kits with anonymous victims	260
Kits where the assault occurred in an unknown jurisdiction	64

Sexual Assault Testing and Evidence Collection Act- Sexual Assault Evidence Collection Program and Pennsylvania State Police Report of 2018, P. L. 1192 No. 164 (2018).

PENNSYLVANIA STATE POLICE

Pennsylvania Sexual Assault Testing and Evidence Collection Act Survey for Mandatory Reporting for 2018

PURPOSE

Act 164 of 2018 (SB1209, PN1886) tasks the Pennsylvania State Police (PSP) with specified reporting duties concerning the Sexual Assault Testing and Evidence Collection Act (SATEC), 35 P.S. §§ 10172.1 – 10172.6. Act 164 was signed by Governor Wolf on October 24, 2018 and went into effect on December 23, 2018.

Act 164 contained several changes to the existing version of SATEC, as well as the creation of a new statutory provision 35 P.S. § 10172.6, imposing biannual reporting requirements on PSP. The newly created provision within SATEC requires PSP to make an initial report to the Pennsylvania Department of Health (DOH) by December 31, 2018, and every six months thereafter. This correspondence is being provided in compliance with that provision.

The report to DOH is to contain the following:

1. the volume of sexual assault evidence submitted for testing
2. the volume of sexual assault evidence awaiting testing
3. the rate of submission of sexual assault evidence by law enforcement agencies in compliance with the provision of this act
4. the speed of testing of sexual assault evidence, average wait time to complete testing and reasons for any delays in submission or testing of sexual assault evidence.
5. a review of current practices, including interagency collaboration with law enforcement agencies and rape crisis centers, in rape kit evidence collection.

CHALLENGES

The information provided in this initial report will be limited due to several contributing factors:

1. There is an insufficient amount of time since Act 164's passage to notify the stakeholders in possession of the data and to properly collect the information required.

2. The initial report must be submitted on the same day the data collection period ends.
3. The data to be collected is not within PSP's control and is likely not tracked or maintained by the stakeholders. Unlike Act 27 of 2015 which mandated law enforcement agencies to annually report backlogged data, Act 164 of 2018 does not mandate law enforcement agencies to provide the data required in the biannual report. Without the legal obligation to provide data, PSP will be relying on the voluntary cooperation of the law enforcement community.

METHOD OF DATA COLLECTION

Information for this report has been collected from various sources, including but not limited to the three publicly-funded Pennsylvania laboratories approved to test sexual assault evidence, the Pennsylvania Coalition Against Rape, the National Institute of Justice, and previously published reports from both the Pennsylvania Department of the Auditor General and the Legislative Budget and Finance Committee. Each of the Pennsylvania laboratories utilizes a laboratory information management system (LIMS) to track evidence submissions, cases completed, backlogs and turnaround times. It is unknown how law enforcement agencies track and maintain evidence within their individual agencies, but the likelihood is that there are numerous types of systems and therefore a lack of uniformity between agencies.

The method of data collection utilized by PSP in the annual reporting mandated by Act 27 of 2015 has proven successful based on the increasing number of respondents over the last three years. Due to the success and familiarity of law enforcement with the process, the established practice of collection will be continued, to include the same timeframes for law enforcement notification and deadlines for submitting data.

Law enforcement agencies (LEAs) have been notified by mail and email of the biannual reporting requirements of Act 164 of 2018 as well as the on-going requirement to report backlogged sexual assault evidence. The web-based tool, SurveyMonkey, will be emailed to all known local LEAs on January 2, 2019 and must be completed by January 31, 2019. The survey will be sent again in July 2019. The surveys will include additional questions to comply with 35 P.S. §§ 10172.6.

Many LEAs are confused as to what constitutes "backlogged sexual assault evidence awaiting testing". The LEAs are in possession of sexual assault kits (SAKs) that do not meet the legal definition and are therefore uncertain how to properly respond to the survey. The survey conducted last year attempted to eliminate the confusion by providing distinct categories for LEAs to use to account for the kits in their possession. This year's survey will be further complicated by the mandate to report the number of SAKs awaiting testing and the number of backlogged SAKs awaiting testing.

Actions taken for the collection of data regarding the sexual assault evidence awaiting testing as of December 31, 2018 included the following:

- The list of LEAs including campus police and approved laboratories with active ORI (Originating Agency) numbers was obtained from the Commonwealth Law Enforcement Assistance Network (CLEAN) Administrative Section, PA State Police.
- A letter dated November 30, 2018 was mailed to LEAs notifying them of dates of an email alert (December 10, 2018) and the survey (January 2, 2019).
- A copy of the letter dated November 30, 2018 was emailed on December 6, 2018 to the Executive Directors of both the Pennsylvania District Attorneys Association and the Pennsylvania Chiefs of Police Association, with the request to disseminate the information to their membership.
- An email alert was sent December 10, 2018 to LEA contacts obtained from CLEAN and to LEA contacts from last year's survey. A separate email alert was sent to PSP Custodial Officers December 17, 2018. The alerts stated the date of survey and reporting requirements.
- A telephone conference was conducted with the Philadelphia Police Department Office of Forensic Science and Allegheny County Office of the Medical Examiner Forensic Laboratory on December 11, 2018 to discuss reporting requirements.
- An email outlining the strategy for data collection and reporting was sent to staff from the Pennsylvania Department of Health and the Pennsylvania Coalition Against Rape on December 11, 2018.

DATA

1. The volume of sexual assault evidence submitted for testing

This is the number of sexual assault cases submitted within a defined period of time to an approved laboratory for testing. The laboratories approved to accept sexual assault evidence are the Allegheny County Office of the Medical Examiner Forensic Laboratory Division, the Pennsylvania State Police Bureau of Forensic Services, the Philadelphia Police Department Office of Forensic Sciences and the Federal Bureau of Investigation (FBI) Laboratory. The FBI joined with the National Institute of Justice to sponsor the SAK Partnership Program. The program accepted SAKs from law enforcement agencies across the country through July 2017. The purpose of the program was to learn more about the handling of SAKs and improve the collection and processing of the evidence.

The time span for the data reported below is from September 8, 2015 through December 31, 2018. September 8, 2015 was the effective date of Act 27 of 2015, which amended the SATEC to mandate the submission of untested kits. Moving forward, reports submitted to DOH every six months hereafter will only include previous six months (January 1 – June 30, July 1 – December 31, etc.).

Sexual Assault Evidence submitted from September 8, 2015 – December 31, 2018

LABORATORY	CASES
Allegheny County Office of the Medical Examiner Forensic Laboratory Division	662
Pennsylvania State Police Bureau of Forensic Services	3,580
Philadelphia Police Department Office of Forensic Sciences	1,871
Federal Bureau of Investigation Laboratory	100
TOTAL	6,213

2. The volume of sexual assault evidence awaiting testing

This is the number of kits in the possession of law enforcement that meet the criteria of awaiting testing. This number will be different from the number reported by law enforcement agencies in the past. For the past three years, law enforcement has been reporting the number of backlogged sexual assault evidence awaiting testing. This is sexual assault evidence meeting the criteria of awaiting testing and in the possession of law enforcement for over 12 months. The new requirement covers kits from the day they first come into the possession of law enforcement.

There was insufficient time to notify and educate 1100+ law enforcement agencies as to the nuances of the new requirements and collect the data prior to December 31, 2018. This data will be collected during the regularly scheduled survey that is released in early January. The tabulated data will be sent to DOH along with the report generated in compliance with the Memorandum of Understanding (MOU) between DOH and PSP. It should be noted that the laboratories from both the Philadelphia Police Department Office of Forensic Sciences and the Allegheny County Office of the Medical Examiner provided this data on December 31, 2018. For uniformity sake, the data will be included in the later report to DOH.

3. The rate of submission of sexual assault evidence by law enforcement agencies in compliance with the provision of this act

As with #2 above, this is newly required information and there was insufficient time to notify and educate 1100+ law enforcement agencies as to the nuances of the new requirements and collect the data prior to December 31, 2018. This data will be collected during the regularly scheduled survey that is released in early January. The tabulated data will be sent to DOH along with the report generated in compliance with the MOU between DOH and PSP.

4. The speed of testing of sexual assault evidence, average wait time to complete testing and reasons for any delays in submission or testing of sexual assault evidence.

The speed of testing is not currently tracked by the three approved laboratories and therefore there is no historical data to provide in this report. The laboratories are in the process of developing a method to measure and track the speed of testing. The speed of testing will be considered the time from when work on the SAK commences until completion, to include the

issuance of laboratory reports. The laboratories anticipate beginning to collect the information early next year with the goal to report on the matter in the next biannual report.

The average wait time to complete testing is calculated as the average turnaround time, the time from when evidence is first submitted to the lab until the reports are completed. Turnaround time is a value which is routinely tracked and monitored by the laboratories through LIMS. Both the speed of testing and the average turnaround time (TAT) will be calculated using laboratory data from the previous six months.

Average Wait Time (Average Turnaround Time)

LABORATORY	Ave TAT
Allegheny County Office of the Medical Examiner Forensic Laboratory (ACOME)	347 days*
Pennsylvania State Police Bureau of Forensic Services	160 days
Philadelphia Police Department Office of Forensic Sciences (PPD/OFS)	103.6 days**

*In the last calendar year, an intensive effort was made by the ACOME to process backlogged sexual assault cases that had not been outsourced, once the grant funding used for this purpose was expended. As a result of that effort, there were a number of high turnaround times due to the completion of cases from 2016 and 2017. If those backlogged cases are not included in the calculation, the turnaround time decreases dramatically from 347 days to 202 days, indicating that additional resources to allow for the elimination of that backlog through outsourcing, together with the launching of the newly validated Y screening procedure in January 2019, will allow for the 180 to be possible in the near future.

**PPD/OFS data for last couple of months indicates a current and sustainable TAT of 60 – 90 days for all incoming SAKs.

The reasons for the delays in submission of sexual assault evidence have been previously reported by LEAs and include the following:

- The LEA was unable to contact the victim.
- The victim was unwilling to cooperate with law enforcement.
- The location of the assault was unknown, thereby leaving the investigative agency of proper jurisdiction uncertain.
- There was a determination by the District Attorney not to prosecute.

Delays in the testing of sexual assault evidence is directly related to insufficient laboratory resources, predominantly staffing. In two of the three laboratories, there is insufficient space to accommodate increased staffing.

5. Review of current practices, including interagency collaboration with LEA and rape crisis centers, in rape kit collection.

The Legislative Budget and Finance Committee report issued in February 2018 on Sexual Assault Evidence Collection, was completed pursuant to Senate Resolution 2017-75. The

report acknowledged localized protocols had been in place prior to the passage of Act 27 of 2015. The report also noted some district attorneys, local law enforcement agencies, health care providers, and victim advocates worked together to devise protocols tailored to local circumstances that promoted interagency collaboration. Along with rape kit collection, some of these protocols allow for anonymous and delayed reporting while establishing and preserving the chain of custody of evidence for the sexual assault. In several of these counties, anonymous reporting consent forms were developed, along with systems to assure health care provider compliance with federal laws and regulations governing the privacy of protected health information and linking of the rape kit evidence to the anonymous victim if the victim later requests an investigation.

To address issues impacting sexual assault evidence collection and management, district attorneys, law enforcement agencies, health care facilities, and victim advocates in some communities have developed differing solutions based on their community resources. Such protocols allow for victim confidentiality, securing of evidence, protection of victim rights, and follow-up if an investigation is requested. A solution that works in one region may not be successful in another. The following provides a review of current practices in several areas of the state.

Allegheny County

The Forensic Biology Section of the Allegheny County Office of the Medical Examiner Forensic Laboratory Division participates in the UPMC Forensic Hospital/Community Advisory Council. This council meets quarterly to discuss evolving topics in trauma, domestic violence, child abuse, and sexual assaults. Attendees include representatives from area hospital Sexual Assault Nurse Examiner (SANE) programs, victim advocacy groups, universities, the Allegheny County District Attorney's Office, and police departments, including the Allegheny County Police Department, McCandless Police Department, Millvale Police Department, Point Park Police Department, and Ross Township Police Department. At this time, participation by police agencies is limited and with no representation by the City of Pittsburgh or consistently with the other Allegheny County agencies. Discussions specific to sexual assaults have included the laboratory's new sexual assault evidence collection kit guidelines, which reflect the new kits in compliance with the PA state collection guidelines, the new collection timeline recommendations published by the NIJ, the new anonymous reporting process, pediatric protocols, and SANE training courses, in which the ACOME does take part.

Bucks County

The Bucks County Sexual Assault Response Team (SART), formed in the early 2000's, is a multidisciplinary interagency team of individuals working collaboratively to provide a victim-centered, trauma-informed response to sexual violence by offering specialized intervention services. The team assists victims to navigate a variety of life issues that may arise such as safety, health, family, finances and the criminal justice process. SART members assist in connecting victims with the services of a variety of community and governmental agencies on a case by case basis.

The team meets quarterly at Network of Victim Assistance (NOVA). There are approximately 19 standing members, however other members of law enforcement and community agencies are invited based on issues brought to the team's attention. The Bucks County Sexual Assault Protocols are reviewed every 12-18 months.

Bucks County has an anonymous reporting protocol whereby a victim age 18 or older can complete a sexual assault exam and complete with evidence collection without the involvement of law enforcement. There is a process in place whereby, with permission of the victim (using a Jane or John Doe signature and associated anonymous ID #), anonymous kits will be sent to the crime lab for testing with results reported to police using the anonymous ID # only. In all cases, the police department with jurisdiction will pick up the kit directly after the forensic exam. If jurisdiction is unknown, the police department with jurisdiction over the hospital where the exam took place, will pick up and store the kit.

The SART created a victim notification protocol, whereby at 22 months after an exam, a NOVA advocate will attempt to contact the victim (if permission was granted at the time of the exam), to determine if they would like to move forward with an investigation and if not, remind them that the evidence may be destroyed.

The SANE Coordinator tracks all victims who present for a full medical-forensic exam or partial exam/consultation. A consultation/partial exam generally involves a request for SANE consultation from the victim, but forensic evidence collection is not completed. This may occur because the assault occurred outside the 120-hour post-assault window or the victim decides to receive only medical care and prophylaxis for sexually transmitted infections or pregnancy.

The team recently sponsored a full day training with Russell Strand titled "Shifting the Paradigm for Investigating Trauma Victimization". It was well received by law enforcement and there were a number of requests for additional training specifically on the Forensic Experiential Trauma Interview (FETI).

Cambria County

Cambria County's Sexual Assault Response Team (SART), formed in 2010, is committed to maintaining a collaborative, victim-centered, and trauma-informed response to sexual violence in their community. The collaborative approach to sexual assault response seeks to lessen the traumatizing nature of the medical forensic evidence examination. Through coordination of medical services, support services, and investigation processes, SART works to reduce repeated and unnecessary questioning of the victim, to ensure the physical and psychological well-being of the victim, and to increase effective collection, documentation and preservation of evidence. SART consists of a core team of responders, the Law Enforcement Officer, the Sexual Assault Nurse Examiner (SANE), and the Victim Advocate.

In addition to the core SART members, other community members and allied professionals are included in these efforts. The larger team consists of Sexual Assault Advocates, Law Enforcement, SANEs, the District Attorney's Office, other medical professionals, the local Child Advocacy Center, Children and Youth Services, Domestic Violence Advocates, Mental Health Professionals, Human Trafficking Response Team Representatives, Critical Incident Stress Management Team Members, University Officials / Counselors, School District Officials / Counselors, State and Federal Corrections, and any other organizations or agencies who are concerned about sexual assault in the community. Cambria County SART meets quarterly and reviews protocol annually. The 7th annual SART Conference is

scheduled for August to bring quality training to the area for first responders and allied professionals around the topic of sexual violence.

Cambria County's Anonymous Reporting protocol has been recognized as model policy by End Violence Against Women International. The protocol creates a fully anonymous process where victims can have forensic evidence collected after a sexual assault and elect not to meet with law enforcement or file charges immediately. Anonymous kits are stored at the largest local police department and connected to the victim by a number known only to the SANE program. Victims have two years to decide if they want to follow through with charges or if they would like the evidence destroyed. During this time, every effort is made by the advocate to remain in contact with the victim and offer support. If they chose to follow through with charges, a procedure is followed to connect the kit to the victim through the SANE program and the evidence is transferred to the appropriate law enforcement agency.

Erie County

The Erie County District Attorney hosted a multidisciplinary meeting in July 2018, and included stakeholders from local law enforcement agencies, the PA State Police Troop E, PA State Police Bureau of Forensic Services, Pennsylvania Coalition Against Rape, Allegheny Health Network, UPMC, and the Crime Victims Center of Erie County. The focus of the meeting was to determine a better process for handling sexual assault kits. Kits of particular concern were those still in the possession of health care facilities, those collected from anonymous victims and those collected from victims assaulted in an unknown jurisdiction. The prosecutors, investigators, laboratory staff, SANE/SAFE health care professionals, and victim advocates present at the meeting discussed the challenges of the existing practices and collaborated to devise workable solutions that could be immediately implemented. The Crime Victims Center documented the agreed upon processes and drafted a revised protocol required by the Pennsylvania Commission on Crime and Delinquency to receive STOP grant funding.

Philadelphia County

The Philadelphia Police Department Office of Forensic Sciences (PPD/OFS) established a multidisciplinary working group to focus on the issues of the historical unsubmitted SAKs and policies related to current SAK submissions. The working group is comprised of the PPD/OFS, the PPD's Special Victims Unit, the Philadelphia District Attorney's Office, Women Organized Against Rape, and the Women's Law Project. The group meets routinely to discuss these issues. Through this working group, the PPD/OFS coordinated a comprehensive plan to inventory, track, and maintain accountability for the backlog of historical unsubmitted SAKs. As of December 2018, the approximately 1900 SAK backlog, which dated from 1986-2011, has been eliminated. However, the group will continue to meet to discuss Combined DNA Index System (CODIS) hits and case follow up on these investigations. Additionally, the group discusses issues or topics related to current case submissions and trends.

In addition to the working group above, both victim advocacy groups are members of the Community Review Team that meets quarterly at the Philadelphia Police Department's

Special Victims Unit to conduct case reviews/audits of all unfounded sexual assault complaints. The City of Philadelphia also has an active Philadelphia Sexual Assault Response Center (PSARC). PSARC was established in 2011 to meet the forensic and medical needs of sexual assault victims who are 16 years of age and older. PSARC is a private, not-for-profit center whose mission is to provide expertise in the assessment and evaluation of sexual assault victims in Philadelphia. All services are provided in a private, medical office setting located adjacent to the Special Victims Unit of the Philadelphia Police Department. This unique setting allows for private, confidential, victim-centered care.

The center is staffed 24/7, by on-call, specially trained and experienced SANE staff who provide forensic rape examinations and evidence collection to both females and males. The SANE staff are all highly-trained, compassionate nurses with years of experience in the care of sexually assaulted patients. PSARC works closely with the Philadelphia Police Department's Special Victims Unit, the Philadelphia District Attorney's Office, Women Organized Against Rape, and the Philadelphia Sexual Assault Advisory Committee to provide a survivor-centered approach to sexual assault. PSARC cares for victims regardless of their cooperation with law enforcement. Accompaniment services, if desired, are provided by Women Organized Against Rape, Philadelphia's rape crisis center. PPD/OFS also meets routinely with PSARC and Sexual Assault Nurse Examiners to discuss topics of mutual interest and provide training, as needed.

PA State Police

The PSP Bureau of Forensic Services (BFS) has a long history of providing training to SANE/SAFE health care professionals and partnering with PCAR. Lectures are provided by Forensic Scientists as part of the Sexual Assault Nurse Examiner Adult/Adolescent Training Course conducted at various sites throughout the state. The lectures cover techniques to optimize evidence collection and explain how the evidence is processed once it is received into the laboratory. The BFS is working to provide requested feedback to the SANEs regarding the quality of the sample collection. The feedback is one means of continual improvement. The BFS has created SATEC Awareness Training PowerPoints available to law enforcement through the Pennsylvania Chiefs of Police Virtual Training Network and through the PA State Police internal Network. Staff have assisted in presenting a SATEC Awareness Training webinar conducted by PCAR. An updated webinar is planned for 2019. The BFS established a resource email account to manage the large volume of inquiries by law enforcement agencies regarding the SATEC. The BFS staff responds to several hundred inquiries annually. The recent changes to SATEC as a result of Act 164 are expected to significantly increase the volume of inquiries.
