

How to use

# INJECTABLE NALOXONE

1

**TAKE THE CAP OFF** the vial and uncover the needle.

2

**INSERT THE NEEDLE** through rubber stopper with the vial upside down.

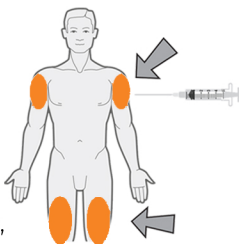

Pull back on plunger and draw up all the liquid from a 1 ml vial.

3

**INJECT 1 ML OF NALOXONE** into an upper arm or thigh muscle. Push down on the plunger to empty the syringe.

If person does not respond in 3-5 minutes, inject another dose.

*Used with permission from New York State Department of Health.*
