

Pre-exposure Prophylaxis (PrEP):

PrEP is a prescription medicine that can help reduce the risk of getting HIV-1 through sex, when taken every day and used together with safer sex practices. Visit [PrEP | HIV Basics | HIV/AIDS | CDC](#) for additional PrEP information.

[PrEP Locator](#) is a national directory of HIV Pre-Exposure Prophylaxis (PrEP) providers in the US. The PrEP Locator seeks to provide patients access to a national, integrated service including both public and private practice providers. The PrEP Locator is powered by the US Centers for Disease Control and Prevention's National Prevention Information Network (NPIN) service provider database. NPIN has a national database of organizations and facilities that provide HIV/STD/TB/hepatitis testing, prevention, capacity building, treatment, care, and support services.

If you need assistance with co-pays or paying for your PrEP medication, [Ready, Set, PrEP](#) and [Advancing Access](#) are available to help match you to a program that best meets your financial needs based on your circumstances and insurance situation and the eligibility criteria for the programs.

The following is a list of PrEP providers throughout Pennsylvania:
