

Pre-exposure Prophylaxis (PrEP):

TRUVADA for PrEP® (pre-exposure prophylaxis) is a prescription medicine that can help reduce the risk of getting HIV-1 through sex, when taken every day and used together with safer sex practices.
<https://www.truvada.com/>

<https://prelocator.org/> is a national directory of providers of HIV Pre-Exposure Prophylaxis (PrEP) in the US. The PrEP Locator seeks to provide patients access to a national, integrated service including both public and private practice providers. The PrEP Locator is powered by the US Centers for Disease Control and Prevention's National Prevention Information Network (NPIN) service provider database. NPIN has a national database of organizations and facilities that provide HIV/STD/TB/hepatitis testing, prevention, capacity building, treatment, care, and support services.

If you need assistance with co-pays or paying for your PrEP medication, Advancing Access is available to help match you to a program that best meets your financial needs based on your particular circumstances and insurance situation and the eligibility criteria for the programs. If you lack insurance coverage, you may be eligible to receive your Gilead medication free of charge through the Advancing Access Patient Assistance Program. Please contact the Advancing Access program to learn more about the program eligibility criteria. <https://www.gileadadvancingaccess.com/>

The following is a list of PrEP providers throughout Pennsylvania:

Pennsylvania PrEP Provider List
