

COMMONWEALTH OF PENNSYLVANIA
DEPARTMENT OF HEALTH
HEAD INJURY PROGRAM
HEAD INJURY REHABILITATION SERVICES
PARTICIPATING PROVIDER AGREEMENT

I, the undersigned (hereinafter referred to as "Provider" or "Contractor"), in consideration of being registered by the Pennsylvania Department of Health, Head Injury Program (hereinafter referred to as "Department" or "HIP"), as a participating provider, do hereby agree to be legally bound as follows: I offer to and shall provide special health services (as listed in Appendix C) for the Department to HIP-eligible individuals in accordance with the restrictions indicated in this Agreement and on the individual's HIP funding approval letter, and shall make reports to the Department concerning such services, and shall accept compensation therefore in accordance with reimbursement policies and rates established in Appendix C by the Department and with the terms and conditions incorporated in and made a part of this Agreement. This Agreement is effective as of _____ and is made pursuant to 35 P.S. 6934 (e), and shall continue in effect, unless otherwise terminated according to the terms and conditions of this Agreement, until _____.

The following appendices are incorporated as part of this Agreement:

- (1) Appendix A - Contractual Conditions and Attachments 1, 2, 3, 4 and 5
(2) Appendix B - Payment Provisions and Attachments 1, 2, 3, and 4
(3) Appendix C - Fee Schedule

The following documents are incorporated by reference into and made a part of this Agreement. The Provider acknowledges having reviewed a copy of the following documents, which are available at http://www.health.pa.gov/vendors. The Provider agrees to comply with the terms of these documents:

- (1) Standard General Terms and Conditions (Rev. 2/21)
(2) HIPAA Business Associate Agreement and Attachment 1 (Rev. 5/13)
(3) Commonwealth Travel and Subsistence Rates (Rev. 8/18)
(4) Minimum Personal Computer Hardware, Software and Peripherals Requirements (Rev. 1/19)

The parties, intending to be legally bound to the provisions set forth herein, hereby affix their signatures to this Agreement:

APPENDIX A

CONTRACTUAL CONDITIONS

I. SERVICES

1. The Department agrees to reimburse the Contractor for the provision of post-acute traumatic head injury rehabilitation services the Department deems to have been provided to the satisfaction of the Department and in accordance with standards set forth in this Agreement. Any changes to this Agreement must be in written amendments that are signed by both the Contractor and the Department. The Contractor shall provide the services as defined in this Appendix A and listed in the Fee Schedule (Appendix C).
2. This Agreement is funded by an appropriation pursuant to 35 P.S. § 6934 (e) which established the Catastrophic Medical and Rehabilitation Fund.
3. The Contractor acknowledges by execution of this Agreement that the Contractor is a “provider” as defined in the Department’s Head Injury Program regulations (28 Pa. Code § 4.1, et seq.), and the contractor agrees to abide by these and any other regulations the Department may promulgate pursuant to 35 P.S. § 6934(e), and by any policy guidelines which may be issued by the Department.
4. Funding/Time Limits - The Contractor shall provide inpatient services, outpatient, day, or home-based services, routine case management services, and transitional case management services, in a combination as may be indicated in the rehabilitation service plan and the discharge plan, for up to a maximum period of time or up to a maximum dollar amount or both, as set forth and as updated in the Pennsylvania Bulletin.
5. Assessment Period - Services as defined below may be provided by the Contractor, and billed according to the Assessment Fee Schedule, for applicants who are determined to be eligible for assessment by the Department or its specifically authorized agents. A Pre-admission Assessment is conducted for all applicants., Transportation (Section #9, below) may also be charged by the Contractor during the Assessment Period. The purpose of the pre-admission Assessment is to determine the individual’s appropriateness for the services provided through the Head Injury Program, regardless if appropriate for services provided by the Contractor completing the assessment. A Comprehensive Neuropsychological Evaluation or Brief Neuropsychological Evaluation may be conducted once the individual has begun services.
 - a. Pre-admission Assessment (and Other Assessment) – An assessment performed by a licensed or certified clinician with a minimum of a bachelor’s degree and three years’ experience in developing individual treatment plans and person-centered goal planning within the brain injury field; if an individual is not licensed or certified, at least five years of brain injury experience is required. This assessment shall take place during a face-to-face meeting with the client during which the following information shall be gathered, medical records reviewed, and an anticipated discharge plan will be developed.
 - 1) The Pre-admission Assessment form (Appendix A, Attachment 1).
 - 2) A Mayo Portland Adaptability Inventory (Appendix A, Attachment 2).
 - 3) A Rehabilitation Service Plan (Appendix A, Attachment 3).
 - 4) A Monthly Charge Estimate (Appendix A, Attachment 4)

5) The Client-Provider Agreement (Appendix A, Attachment 5).

- b. Comprehensive Neuropsychological Evaluation - A comprehensive evaluation; conducted during the rehabilitation period by a Pennsylvania licensed psychologist/neuropsychologist using a set of standardized tests and therapeutic procedures to evaluate the cognitive, emotional, psychosocial, and behavioral impairments caused by brain injury, and to make recommendations for treatment frequency, intensity, and duration. Records review and clinical interviews with the individual's caregivers/family members may be included. This comprehensive evaluation can only be billed if a brief neuropsychological evaluation has not already been funded by the Head Injury Program. The evaluation must be conducted after an individual has begun therapeutic services.
 - c. Brief Neuropsychological Evaluation - A brief neuropsychological evaluation includes up to five hours of a cognitive functioning assessment conducted by a Pennsylvania licensed psychologist/neuropsychologist with experience evaluating individuals with brain injury. This evaluation may be used for treatment planning and decision-making. Areas assessed may include, but are not limited to, attention/concentration, memory, visuospatial skills, and executive functions including planning, decision-making, problem-solving, judgment, and adjustment. Records review and clinical interviews with individual's caregivers/family members may be included. The report generated will identify strengths as well as injury-related barriers and provide specific recommendations for interventions. One brief neuropsychological assessment is permitted. A brief neuropsychological assessment can only be billed if a comprehensive neuropsychological evaluation has not already been funded by the Head Injury Program. The evaluation must be conducted after an individual has begun therapeutic services.
6. Rehabilitation Period / Outpatient Services Billable - Rehabilitation services as defined below may be provided by the Contractor on an outpatient, day, or home-based basis and billed according to the Rehabilitation Period / Outpatient Fee Schedule for clients whose rehabilitation service plan has been approved in writing by the Department. These services may be provided only for rehabilitation purposes related to the client's brain injury and consistent with the rehabilitation service plan. Service plans are to be developed with a focus on person-centered planning. Routine Case Management Services (Section #8, below) and Transportation (Section #9, below) may also be charged by the Contractor during the Rehabilitation Period. It is the expectation that the Contractor will assure brain injury oversight to all staff providing the services listed (Section #6 and #7, below). In addition to the qualifications listed below, staff must pass a criminal record check, be a Pennsylvania licensed professional (if licensure is required), a United States citizen, and possess a valid driver's license, vehicle registration and vehicle insurance (if driving is required to provide service).
- a. Residential Services (Personal Care Daily Rate) - Personal care services are designed to assure the health, well-being and safety of the individual, and include such activities as assistance with eating, bathing, dressing, personal hygiene, and activities of daily living. This service may also include housekeeping chores such as bedmaking, dusting, and vacuuming, which are incidental to the care provided, or which are essential to the health and welfare of the individual. These services may only be provided in a residential setting

and may occur, as necessary, during the provision of other approved outpatient rehabilitative service(s).

Qualifications: Must be at least 18 years of age with a high school diploma or equivalent.

- b. Assisted Neurobehavioral Therapy (Behavioral Management Therapy) - Services focused on developing and implementing a comprehensive behavior plan for individuals with brain injury that is based upon a functional behavior assessment, utilizes evidence-based interventions, and integrates evaluations and recommendations provided by therapists and consulting physicians. The plan focuses on eliminating or decreasing target behaviors through environmental modifications or the development of functionally equivalent replacement behaviors. The structure and support necessary to maintain the environmental modifications and to promote acquisition, generalization and maintenance of replacement behaviors is identified, with the goal of establishing safety and stability. For mood stability, the focus of treatment may include medication management, behavioral interventions, and treatment to develop the structure and support necessary to maintain safety and stability, and to promote the individual's readiness for living in a less intensive environment and integration into the community.

Qualifications: Must be a board-certified behavior analyst, or licensed psychologist, behavior specialist, licensed clinical social worker (LCSW) or licensed professional counselor (LPC) with at least two years of experience working with individuals with brain injury who exhibit challenging behaviors. Professionals without the required licensure or certification, may provide behavior management services under the supervision of a practitioner who is licensed, if they have a minimum of a master's degree in social work, psychology, education or counseling.

- c. Assistive Community Integration & Life Skills Training - Services focus on assisting individuals to engage in purposeful and productive activities to maximize their independence and improve their quality of life. Services may address, but are not limited to, self-care, household management, community involvement, and community mobility. In particular, community-based activities are used to facilitate the individual's psychosocial and interpersonal skills development. The emphasis is on maintaining a productive activity pattern that enhances the quality of life for the individual and his/her family and on promoting diversity, equity, and inclusion in the community.

Qualifications: Must have a high school diploma or equivalent and supervision by a licensed or certified professional or an individual with at least two years of brain injury experience. If the individual has a bachelor's degree in an allied field, they must be supervised according to the HIP provider's policy.

- d. Supportive Counseling - Supportive Counseling is the assessment and treatment of an individual's mental, emotional, and behavioral functioning following a traumatic brain injury, that result in the need for a higher level of attention to their mental health than they may be receiving through other brain injury therapies. The purpose of the supportive counseling services is to enable the individual to participate satisfactorily in and benefit from the Rehabilitation Service Plan. Services focus on helping the individual to adjust to changes that

have occurred since their brain injury and to learn coping strategies to live as independently as possible, engage in purposeful activities, maintain interpersonal relationships, and improve their overall quality of life. There may be times the provider engages the individual's family members or other support persons in sessions to address their needs as well.

Qualifications: Must be a Pennsylvania LPC or LCSW, or individual with a master's degree in a related field with supervision by a licensed mental health professional with experience in brain injury rehabilitation.

- e. Substance Abuse Education and Prevention - Services provided to educate individuals with identified alcohol and substance abuse issues and their families and communities on the nature and extent of alcohol and drug use, abuse and addiction, and the potential consequences. Therapists use motivational interviewing and other modalities to determine an individual's commitment to stop using alcohol and drugs. Treatment focuses on increasing awareness and helping individuals and their support systems understand the negative impact of substance use on TBI recovery. The development of replacement behaviors and a person-centered stable activity pattern are key elements.

Qualifications: Must be a licensed psychologist, LPC, LCSW, certified associate addiction counselor or certified alcohol and drug counselor in the state of Pennsylvania and have at least two years of experience working with individuals with brain injuries or cognitive disorders.

- f. Therapeutic Recreation - Services and recreational activities used to improve an individual's physical, cognitive, emotional and spiritual functioning in order to facilitate full participation in life. Therapeutic recreation includes using a variety of techniques such as arts and crafts, animals, sports, games, dance and movement, drama, and community outings to help maintain the physical, mental and emotional well-being of individuals with brain injuries. These person-centered activities are developed to help reduce depression, stress and anxiety; recover basic motor function and reasoning abilities; build confidence; and socialize effectively.

Qualifications: Therapeutic recreation services are provided or directly supervised by a certified therapeutic recreation specialist with experience working with individuals with brain injury.

- g. Work Skills Training - Services focused on individuals to engage in purposeful and productive activities in order to develop and enhance work behaviors, coping skills, and interpersonal/communication skills in preparation for paid or unpaid employment. Support is not intended to provide training on specific job tasks but focus on an understanding of general work habits and attitudes. Person-centered skill development and training may include, but is not limited to, social interaction, disability adjustment, self-expression, emotional/behavioral management, and cognitive and physical function.

Qualifications: Providers of this service must have a minimum of a high school diploma and three years of experience working with individuals with brain injury or a bachelor's degree or higher level of education. Licensure or certification in a related field or certification as a brain injury specialist or both is preferred.

- h. Routine Case Management - The Contractor shall provide routine case management services during the Assessment Period and Rehabilitation Period. Reimbursement for routine case management services will be limited to the following activities as specified in the Fee Schedule: development and modification of rehabilitation service plans; monitoring the client's progress; accessing technological assistive devices; setting up resources; scheduling medical appointments; and discharge planning. Discharge planning shall be part of the client's rehabilitation service plan and be updated if necessary. It shall outline the plan for services during the client's six-month transition following rehabilitation services. The Contractor may employ or contract with a case manager to provide these services. As part of the rehabilitation service plan, routine case management may be billed for travel time to and from the client's location when providing home and community-based rehabilitation.

Qualification: Must be provided by a degreed professional in an allied field, certified brain injury specialist or clinician. Must have, or be supervised by a degreed clinician with, at least one year of brain injury rehabilitation experience.

- i. Cognitive Rehabilitation Therapy - Cognitive rehabilitation therapy (CRT) focuses on the acquisition, application, adaptation, generalization and maintenance of cognitive skills. The aim of therapy is the attainment/re-attainment of skills and enhancement of the individual's awareness and functional competence in real-world situations. It can augment and support application of skills and strategies being learned in occupational, physical, and speech therapies or psychology in various settings. The process includes increasing awareness through education, the development and strengthening of cognitive skills, the development and application of environmental, internal and external compensatory strategies, or the use of cognitive orthotics and prostheses to facilitate and maximize functioning in the home and community.

Qualifications: Must possess a minimum of a bachelor's degree in an allied field with licensure or certification. Applicable allied rehabilitation degree programs include counseling, education, neuropsychology, occupational therapy, physical therapy, psychology, recreation therapy, social work, and speech-language pathology. If not credentialed, must hold a bachelor's degree and must be supervised by a licensed or certified clinician with a minimum of one year of experience working in brain injury rehabilitation.

- j. Occupational Therapy - Services include a neurologically oriented comprehensive evaluation of the individual's participation in everyday activities, including basic activities of daily living, instrumental activities of daily living, social engagement, and vocational pursuits. Assessment of physical, cognitive, and psychosocial skills and abilities impacting performance in these areas guide treatment to preserve, restore or enhance function in body systems, through development of compensatory strategies, identification and use of adaptive equipment and environmental modifications. The purpose is to facilitate active engagement in everyday activities, to maximize independence and quality of life. Therapeutic interventions may be performed in the clinic, home, or community setting.

Qualifications: Must be a licensed and registered occupational therapist (OTR/L). Certified and licensed occupational therapy assistants (COTA/L) can practice only under the supervision of an OTR/L and carry out the treatment plan established by the OTR/L. Experience working with individuals with brain injury is required for both OTR/L and COTA/L.

- k. Physical Therapy - Therapeutic intervention to develop, preserve and restore or extend maximum body movement and physical function to help individuals recover from their injury, relieve pain, prevent future injury, and manage chronic conditions. Therapy begins by conducting an evaluation, which includes a medical history and physical examination. Based on this information, the Physical Therapist (PT) will structure and implement a treatment plan, monitor progress, and provide hands-on support. Therapy can be provided on a short-term or ongoing basis, according to the individuals need to maintain adequate function.

Qualifications: Must be a Pennsylvania licensed and degreed PT. A licensed physical therapy assistant (PTA) can provide physical therapy services as well, but must practice only under the direction and supervision of a licensed PT, to carry out treatment plans established by the PT. Experience working with individuals with brain injury is required for both a PT and a PTA.

- l. Psychology or Neuropsychology - Psychology is the scientific study of mind and behavior and includes conscious and unconscious feelings and thoughts. According to the Department of State website in Pennsylvania (dos.pa.gov), the practice of psychology involves the application of established principles of learning, motivation, perception, thinking, and emotional relationships to problems of personality evaluation, group relations, and behavior adjustment. Psychologists use a variety of methods and techniques to identify and understand the source of their thoughts and emotions in order to improve their quality of life. They assess, diagnose and treat psychological problems and behavioral dysfunction.

Because the scope of psychology is so large, branches/sub-fields have formed to address specific psychological issues. The specialty of neuropsychology is primarily focused on brain-behavior relationships and the impact of brain injuries on an individual's cognitive and psychosocial functioning. In brain injury rehabilitation programs, neuropsychologists perform a vital role in conducting assessments and designing treatment programs for individuals with brain injuries; guiding and supervising other treatment team members; and educating individuals with brain injuries and their family members about ways to adjust satisfactorily to short-term and long-term functional changes following injury.

Qualifications: Must be a licensed psychologist in Pennsylvania (which includes specialties like neuropsychology) and have two years' experience in assessing and treating individuals with brain injuries.

- m. Speech Therapy (Speech and Language Therapy) - Services to prevent, assess, diagnose, and treat speech, language, social communication, cognitive-communication, and swallowing disorders. Therapy may address problems with speech sounds, hearing, language, literacy, functional communication, social

communication, voice, fluency, cognitive-communication, and feeding and swallowing, in an effort to maximize functional independence.

Qualifications: Must be a Pennsylvania licensed speech-language pathologist (SLP). Experience working with individuals with brain injury is required.

- n. Cognitive Rehabilitation Therapy – Group - CRT focuses on the acquisition, application, adaptation, generalization and maintenance of cognitive skills. The aim of therapy is the attainment/re-attainment of skills and enhancement of the individual’s awareness and functional competence in real-world situations. It can augment and support application of skills and strategies being learned in occupational, physical, and speech therapies or psychology in various settings. The process includes increasing awareness through education, the development and strengthening of cognitive skills, the development and application of environmental, internal and external compensatory strategies, or the use of cognitive orthotics and prostheses to facilitate and maximize functioning in the home and community. Must be provided in a group setting.

Qualifications: Must possess a minimum of a bachelor’s degree in an allied field with licensure or certification. Applicable allied rehabilitation degree programs include counseling, education, neuropsychology, occupational therapy, physical therapy, psychology, recreation therapy, social work, and speech-language pathology. If not credentialed, must hold a bachelor’s degree and must be supervised by a licensed or certified clinician with a minimum of one year of experience

- o. Occupational Therapy – Group - Services provided in a group setting and focus on basic activities of daily living, exercise, and social engagement. Assessment of physical, cognitive, and psychosocial skills and abilities impacting performance in these areas guide treatment to preserve, restore or enhance function in body systems, through development of compensatory strategies, identification and use of adaptive equipment and environmental modifications. In a group setting, interventions can include strength and endurance training as well sensory integration and education. The purpose is to facilitate active engagement in everyday activities, to maximize independence and quality of life.

Qualifications: Must be a OTR/L. COTA/Ls can practice only under the supervision of an OTR/L and carry out the treatment plan established by the OTR/L. Experience working with individuals with brain injury is required for both OTR/L and COTA/L.

- p. Physical Therapy – Group - Therapeutic intervention provided in a group setting to develop, preserve and restore or extend maximum body movement and physical function to help individuals recover from their injury, relieve pain, prevent future injury, and manage chronic conditions. Group therapy may be used to address impairments, activity limitations and participation restrictions.

Qualifications: Must be a Pennsylvania licensed and degreed PT. A licensed PTA can provide physical therapy services as well, but must practice only under the direction and supervision of a licensed PT, to carry out treatment plans established by the PT. Experience working with individuals with brain injury is required for both a PT and a PTA.

- q. Psychological Services – Group - Psychology is the scientific study of mind and behavior and includes conscious and unconscious feelings and thoughts. According to the Department of State website in Pennsylvania (dos.pa.gov), the practice of psychology involves the application of established principles of learning, motivation, perception, thinking, and emotional relationships to problems of personality evaluation, group relations, and behavior adjustment. Psychologists use a variety of methods and techniques to identify and understand the source of their thoughts and emotions in order to improve their quality of life. They assess, diagnose and treat psychological problems and behavioral dysfunction.

Because the scope of psychology is so large, branches/sub-fields have formed to address specific psychological issues. The specialty of neuropsychology is primarily focused on brain-behavior relationships and the impact of brain injuries on an individual's cognitive and psychosocial functioning. In brain injury rehabilitation programs, neuropsychologists perform a vital role in conducting assessments and designing treatment programs for individuals with brain injuries; guiding and supervising other treatment team members; and educating individuals with brain injuries and their family members about ways to adjust satisfactorily to short-term and long-term functional changes following injury. In a group setting, psychology services may provide self-expression, feeling-oriented discussions and reality-oriented discussions. Psychologists educate on proven strategies for managing specific problems, such as depression or anxiety. Must be provided in a group setting.

Qualifications: Must be a licensed psychologist in Pennsylvania (which includes specialties like neuropsychology) and have two years' experience in assessing and treating individuals with brain injuries.

- r. Speech Therapy (Speech and Language Therapy) – Group - Within the group setting, services are provided to prevent, assess, diagnose, and treat speech, language, social communication, cognitive-communication, and swallowing disorders. Therapy may address problems with speech sounds, hearing, language, literacy, functional communication, social communication, voice, fluency, cognitive-communication, and feeding and swallowing, in an effort to maximize functional independence.

Qualifications: Must be a Pennsylvania licensed SLP. Experience working with individuals with brain injury is required.

- s. Psychiatry or Neuropsychiatry - Medical services that focus on the diagnosis, treatment, and prevention of mental, emotional, and behavioral disorders. Psychiatrists are medical doctors (an M.D. or a D.O.) who specialize in mental health, including substance use disorders. They use a variety of treatments that may include individual or group psychotherapy, medication (particularly psychopharmacologic or psychotropic drugs), psychosocial interventions, and other approaches based on the specific needs of the individual. For persons with brain injuries, psychiatrists may help the team to differentiate the emotional consequences of the brain injury from pre-existing primary psychiatric diagnoses or mental health disorders, in order to develop an effective treatment plan. In such settings, psychiatrists are often employed on a consulting basis, and frequently prescribe medications for behavior management.

Neuropsychiatry or organic psychiatry is a branch of medicine that focuses on mental disorders attributable to diseases of the nervous system and on the relationship between the brain and behavior. Neuropsychiatry is considered to intersect with neurology and neurosurgery within medicine and with neuroscience and psychology as well. [The American Neuropsychiatric Association, established in 1988, is a nonprofit organization of professionals in behavioral neurology, neuropsychiatry, neuropsychology, and the clinical neurosciences.]

Qualifications: Psychiatrists/neuropsychiatrists must possess a medical degree, have completed a medical residency in psychiatry, and be licensed as a physician by the Pennsylvania State Board of Medicine. Some psychiatrists are board-certified in both neurology and psychiatry and may be referred to as behavioral neurologists. To serve individuals in the Head Injury Program, professional experience in a specialized program for persons with brain injuries is preferred.

- t. **Physiatry** - Medical services provided by a physician (M.D. or D.O.) specializing in physical medicine and rehabilitation. Physiatrists evaluate and treat individuals with physical or cognitive impairments and disabilities resulting from a variety of musculoskeletal, neurological or other conditions. Physiatrists design comprehensive, patient-centered treatment plans, using traditional and innovative treatments to maximize functional capabilities and enhance quality of life.

Qualification: Must possess a medical degree, have completed a medical residency in physical medicine and rehabilitation and be licensed as a physician by the Pennsylvania State Board of Medicine. Professional experience working with persons with brain injuries is required.

- u. **Neurology** – Medical services that specialize in the diagnosis and treatment of organic disorders of nerves and the nervous system.

Qualifications: Must be a medical doctor, licensed by the state of Pennsylvania, with specialized training in investigating, diagnosing, treating, and managing disorders of the brain and nervous system.

- v. **Nursing** – Nursing services are direct services prescribed by a physician and are necessary to meet the needs of the individual with significant medical conditions or complex health care needs. These needs require specific skilled nursing services that cannot be provided by non-nursing personnel. These services are necessary to support the health, welfare, and safety of the individual and to enable the individual to integrate more fully into the community. Nursing services are individual, and can be continuous, intermittent, or short-term, based on the individual’s assessed need.

Services provided must fall within the scope of the State’s Nurse Practice Act. A physician’s order must be obtained every 60 calendar days for continuation of the service.

Qualifications: At minimum, must be a Pennsylvania licensed registered nurse (RN), or licensed practical nurse (LPN) under the supervision of a licensed registered nurse.

- w. Transportation - Mileage reimbursement billed by a HIP provider when conducting an assessment or providing home and community-based rehabilitation in a client's home or in the community. Reimbursement rates are based on the prevailing Commonwealth mileage reimbursement rate. Transportation may only be billed for provider travel. Client travel is not reimbursable.
- x. Respite - Services are recommended to provide supervision to individuals, for a maximum of twenty-four hours, due to the absence or need for relief of those persons who typically provide continuous care. Respite services are provided to individuals in their own home, the home of a family member or relative, in a day treatment program, or in a residential facility. Respite services are available to Head Injury Program clients receiving outpatient or home- and community-based services. Therapeutic Services cannot be provided simultaneously with Respite.

Qualifications: Must be provided or subcontracted by an approved Head Injury Program Provider.

- y. Music Therapy - Services using music to address physical, sensory, cognitive, emotional and social functioning. Music therapy interventions can be designed to promote wellness, support physical rehabilitation, alleviate pain, manage stress, express feelings, improve cognitive and communication skills, and enhance interpersonal relationships. Music therapy may be provided individually or in a group and in a home and community-based or facility setting.

Qualifications: Must have at least a bachelor's degree in music therapy and board certification through the Certification Board for Music Therapists. A minimum of one year of experience working with individuals with brain injury is required, or supervision by a clinician with brain injury experience.

- z. Art Therapy - Art therapy incorporates principles of psychology, counseling, and visual arts in a creative process to help individuals explore and express their emotions, increase self-awareness and self-esteem, develop strategies to cope with brain injury impairments, manage behaviors, and improve social skills. An overall focus is to enhance the individual's functioning, personal well-being, and quality of life. Art therapy may be provided individually or in a group and in a home- and community-based or facility setting.

Qualifications: Must have a master's degree in art therapy or a master's degree in a counseling or related field with additional course work in art therapy, and credentialing as a registered art therapist – provisional, registered art therapist, or a board-certified art therapist. A minimum of one year of experience working with individuals with brain injuries.

- aa. Vision Therapy - Vision therapy is designed to develop or improve visual skills and abilities; improve visual comfort, ease, and efficiency; and improve visual processing or interpretation of visual information. Following a comprehensive

evaluation, therapy focuses on areas such as, but not limited to, blurred vision, double vision, sensitivity to light, reading difficulty, headaches with visual tasks, reduction or loss of visual field, and difficulties with eye movements and eye teaming.

Qualifications: Must be provided by an optometrist, neuro-optometrist or behavioral optometrist with post graduate vision therapy training and two years' experience in providing vision therapy. OTR/L and COTA/L and many other therapists may provide additional reinforcement exercises and therapy based on the optometrist's evaluation and guidance.

- bb. Vestibular Therapy - Specialized form of physical or occupational therapy intended to alleviate problems caused by vestibular disorders—primarily vertigo and dizziness, gaze instability, imbalance or falls, blurred vision, and motion sensitivity. The vestibular therapist will evaluate different areas of vestibular dysfunction, teach the individual compensatory strategies to help manage their symptoms during daily activities and increase the individual's tolerance for complex sensory environments they encounter in everyday life. The vestibular therapist also collaborates with other therapy team members.

Qualifications: Must be either a licensed PT or OTR/L licensed occupational therapist in the state of Pennsylvania with a special interest in, continuing education courses in, or certification in vestibular therapy. The vestibular therapist should have at least two years of experience working with individuals with brain injuries.

- cc. Nutritional Therapy (Medical Nutrition Therapy) - Services focused on individualized nutrition interventions that may be utilized to promote optimal health and manage the treatment of conditions such as diabetes, heart disease, depression, obesity, cancer, and arthritis. Nutrition plans may be ordered and approved by a physician, registered nurse, or a registered dietician nutritionist (RDN).

Qualifications: Must be a RDN. Experience working with individuals with brain injuries is preferred.

- dd. Telerehab Cognitive Rehabilitation Therapy - One-to-one services using a HIPAA-compliant platform with audio and video to address CRT goals. [Refer to the definition for Cognitive Rehabilitation Therapy.] The platform and devices being used should allow screensharing. It is preferred that telerehab be provided in conjunction with in-person cognitive rehabilitation therapy. If telerehab is approved for an individual's rehabilitation service plan, it must be provided as part of the individual's regular schedule of services; however, it could also be provided if there is an exceptional circumstance that may preclude an in-person session (for example, poor road conditions due to weather, positive COVID-19 test in the household).

Qualifications: Must possess a minimum of a bachelor's degree in an allied field with licensure or certification. Applicable allied rehabilitation degree programs include counseling, education, neuropsychology, occupational therapy, physical therapy, psychology, recreation therapy, social work, and speech-language pathology. If not credentialed, must hold a bachelor's degree

and must be supervised by a licensed or certified clinician with a minimum of one year of experience working in brain injury rehabilitation.

- ee. Telerehab Cognitive Rehabilitation Therapy – Group - Services provided in a group setting using a HIPAA-compliant platform with audio and video to address CRT goals. [Refer to the definition for Cognitive Rehabilitation Therapy.] The platform and devices being used should allow screensharing. It is preferred that telerehab be provided in conjunction with in-person cognitive rehabilitation therapy. If group telerehab is approved for an individual’s rehabilitation service plan, it must be provided as part of the individual’s regular schedule of services; however, it could also be provided if there is an exceptional circumstance that may preclude an in-person session (for example, poor road conditions due to weather, positive COVID-19 test in the household).

Qualifications: Must possess a minimum of a bachelor’s degree in an allied field with licensure or certification. Applicable allied rehabilitation degree programs include counseling, education, neuropsychology, occupational therapy, physical therapy, psychology, recreation therapy, social work, and speech-language pathology. If not credentialed, must hold a bachelor’s degree and must be supervised by a licensed or certified clinician with a minimum of one year of experience working in brain injury rehabilitation.

- 7. Rehabilitation Period / Inpatient Services Billable - Inpatient programs as defined below may be provided by the Contractor and billed according to the Rehabilitation Period / Inpatient Fee Schedule for clients whose rehabilitation service plan has been approved in writing by the Department. The daily rate for these programs includes room and board, personal care services as necessary, and, as indicated by the rehabilitation service plan, any of the outpatient services listed in Section #6, above. Routine Case Management Services (Section #8, below) and Transportation (Section #9, below) may also be charged by the Contractor during the Rehabilitation Period.
 - a. Community Re-Entry Residential Program – Services designed for individuals who have the potential to live in a more independent setting. These individuals may still benefit from therapy and structured support and may require up to 24-hour supervision. The individual is ambulatory without supervision or uses an assistive device independently; is able to perform basic self-care tasks; and follows safety guidelines.
 - b. Intensive Rehabilitation Level One - Services designed for individuals who require an intensive therapeutic environment and 24-hour supervision and assistance due to neurocognitive barriers. Therapy assessments and evaluations serve to develop the structure and supports necessary for more independent functioning and improved communication and life skills. The individual is ambulatory without supervision or is independent with the use of an assistive device; may need minimal assistance for basic self-care tasks; and responds to cues to follow safety guidelines.
 - c. Intensive Rehabilitation Level Two - Services designed for individuals who require an intensive therapeutic environment, requiring 24-hour supervision and assistance due to physical and medical issues (for example – swallowing, transfers, ADL needs) as well as significant neurocognitive barriers. Therapy assessments and evaluations serve to develop structure and supports necessary for more independent functioning and improved communication. The

individual requires moderate to maximum assistance to complete self-care tasks. Person requires moderate to maximum assistance to complete self-care and for all functional mobility.

- d. Intensive Neurobehavioral Residential Program - Services designed for individuals who exhibit behavioral problems including agitation or verbal/or physical aggression, or who are severely disoriented. These individuals require intensive structured environment with 24-hour supervision an intensive staff to client ratio. The individual demonstrates little to no awareness of the brain injury barriers and need for structure/strategies. As a result, the person requires therapy assessments and ongoing interventions to develop replacement behaviors; skills and strategies to support improved functioning. The person demonstrates mood instability or behavioral difficulties or both of limited intensity, frequency, and duration.
- e. Intensive Neurobehavioral Evaluation - Designed for individuals who exhibit significant neurobehavioral problems including agitation, verbal/physical aggression, provocative/instigative or refusal behaviors, mood instability, severe neurocognitive impairments or language communication impairments or both. The individual demonstrates little to no awareness of cognitive impairments related to their brain injury and need for structure/strategies. Cognition and communication barriers can include dense aphasia or disorientation and confusion. The individual's treatment history may also be further complicated by active substance use issues, resistance to treatment and safety issues including wandering, falls and elopement. To be appropriate for this service an individual must have a solid living disposition in place and be willing to participate in recommended medical rehabilitation trials. Individuals may require a structured environment with 24-hour supervision and moderate to maximum staffing available to support crisis management and safety issues. One to-one staff support, and supervision are typically required, particularly when first admitted.

The Intensive Neurobehavioral/ Neurocognitive Evaluation period may last up to 90 calendar days. Services include therapy evaluations, psychiatry and neuropsychiatry recommendations that provide a comprehensive diagnostic evaluation of the client's current level of functioning and recommendations on what elements will be necessary in developing a realistic plan for future treatment and long-term needs. Programs providing this level of care, should have a full therapy team (including, but not limited to, physical therapy, occupational therapy, speech language pathology, and psychology), medical oversight by Psychiatry and Neuropsychiatry/Psychiatry, and behavior analysis.

- 8. The Contractor shall provide routine case management services during the Assessment Period and Rehabilitation Period. Reimbursement for routine case management services will be limited to the following activities as specified in the Fee Schedule: development and modification of rehabilitation service plans; monitoring the client's progress; accessing technological assistive devices; setting up resources; scheduling medical appointments; and discharge planning. Discharge planning shall be part of the client's rehabilitation service plan and shall outline the plan for services during the client's six-month transition following rehabilitation services. The Contractor may employ or contract with a case manager to provide these services.

9. During the Assessment Period and Rehabilitation Period, the Department will reimburse Contractors for mileage according to the Commonwealth established rate for Transportation. This mileage may be incurred in the course of traveling to/from a meeting with a client who may not be able to travel to the provider, or in transporting a client to HIP-reimbursable rehabilitation services approved via the rehabilitation service plan.
10. Transition Period - The Contractor shall provide transitional case management services following the client's completion of rehabilitation during the Transition Period. Transitional case management services shall be billed according to the Transition Period Fee Schedule for clients who have completed the Rehabilitation Period, and shall consist of the following:
 - a. Assisting the client in gaining access to services from which the client may benefit and for which the client may be eligible.
 - b. Monitoring and evaluating the client's progress in completion of the discharge plan.
 - c. Determining that the client has fully transitioned in accordance with the established discharge plan.

II. STAFFING

The facility shall maintain staffing according to the accreditation standards under which the Contractor has been approved to provide service.

III. REQUIREMENTS FOR PROVISION OF SERVICES

1. The Department, in its sole discretion, determines which applicants are eligible for an assessment and services under this Agreement. The Contractor under this Agreement shall have a separate letter of authorization from the Department, or the Department's specifically authorized agent, prior to the provision of an assessment or any other services to applicants to the Head Injury Program. Individuals eligible for an assessment will be referred in writing to the Contractor for a pre-admission assessment and development of a rehabilitation service plan. The pre-admission assessment shall be performed by a qualified clinician or team of clinicians with experience in cognitive, vocational, and behavioral rehabilitation. Documentation of the pre-admission assessment shall be maintained in the client's file.
2. The Department will notify applicants in writing of their eligibility for enrollment after receiving the completed assessment or rehabilitation plan or both from the provider. The Department will send a letter notifying the Contractor of the enrollment of the applicant as a client of the Head Injury Program and authorizing the client's rehabilitation services as submitted in the approved rehabilitation service plan.
3. The Contractor must submit any requests for modifications to the rehabilitation service plan in writing in advance to the Head Injury Program in order to obtain written approval prior to implementation of any such modification. The Head Injury Program will review the request for modification and advise the Contractor in writing of the approval or disapproval of the request.

IV. PROVIDER STANDARDS

1. All services rendered by the Contractor shall be consistent with customary standards of professional practice in amount, duration, scope, and quality.
2. The Contractor, and its employees and agents who are providing services under this Agreement, shall be qualified, licensed or certified or both in their respective disciplines as required by the Commonwealth of Pennsylvania and meet staffing standards as required by the Commonwealth of Pennsylvania and their respective accrediting body or waiver agreement.

V. MINIMUM QUALIFICATIONS OF REHABILITATION CONTRACTORS

1. A Contractor shall be accredited by an accrediting body recognized and approved by the Department. The names of the specific accrediting bodies are available upon request from the Department. To make such a request the Contractor shall write or call the Head Injury Program, Department of Health, 7th Floor East Wing, 625 Forster Street, Harrisburg, PA 17120. The telephone number is (717) 772-2763. The Contractor shall submit documentation of its accreditation to the Head Injury Program prior to receipt of a fully executed and approved contract. The Contractor shall maintain such accreditation throughout the term of the contract.
2. The Contractor and all subcontractors shall be licensed by the appropriate Pennsylvania agency according to the laws of the Commonwealth of Pennsylvania. The Contractor shall submit documentation of its licensure to the Head Injury Program prior to receipt of a fully executed and approved contract.
3. The Contractor shall notify the Department immediately of any changes in its accreditation or licensure status.
4. When possible, the Contractor shall participate in other state programs that fund head injury rehabilitation services unless granted an exception in writing by the Head Injury Program. Those other state programs include, but are not limited to, the Department of Human Services, Office of Developmental Programs, Community Health Choices Waiver Programs; and the Department of Labor and Industry, Office of Vocational Rehabilitation Program. The Contractor, if licensed as an outpatient clinic, or if eligible otherwise, shall participate in the Department of Human Services, Office of Medical Assistance Programs. The Contractor shall maintain this participation throughout the contract term. The Contractor shall notify the Department immediately of any change in participation.
5. The Contractor shall provide staff training about available community resources and head injury rehabilitation programs and services throughout the Commonwealth of Pennsylvania.

VI. CLIENT TRANSFER

1. The Contractor shall maintain a written agreement with at least one other facility that is geographically proximate and operating a similar head injury rehabilitation program to provide continuing care in the event of an emergency, closure or Federal or state or both suspension of operation of the facility.

2. Except for an emergency, as defined in paragraph 3 below, the Contractor shall not transfer clients to another medical care facility or head injury rehabilitation facility unless prior arrangements for admission have been made and the client or legal guardian has agreed to the transfer.
3. The Contractor shall notify the Head Injury Program in writing in advance of a client transfer, unless the transfer results from an emergency due to natural disaster, immediate Federal or state closure of the facility, or the client requires hospitalization for emergency medical reasons. The Head Injury Program must approve transfers, except for emergency transfers, in writing before the transfer occurs.

VII. REPORTING REQUIREMENTS

1. The Contractor shall submit to the Department the pre-admission assessment and rehabilitation service plan forms as appropriate for each individual referred from the Head Injury Program. The Department may prospectively amend or revise the pre-admission assessment and rehabilitation service forms, in writing, by notifying the Contractor at least 30 calendar days in advance by first class U.S. mail of changes. Such changes are incorporated herein by reference as of their effective date(s), as indicated in the notice.
2. All modifications to the rehabilitation service plan shall be submitted in writing to the Head Injury Program in advance for prior approval. The Head Injury Program will respond in writing to the request for modification. The Head Injury Program, as stated in Section VI, Client Transfer, must approve non-emergency client transfers, in advance. In addition, any unexpected changes in the client's status, such as death or voluntary discharge from treatment, shall be reported within seven calendar days to the Head Injury Program.
3. The Contractor shall prepare a progress report for each client, at a minimum of each 90 calendar-day period and submit the report to the Department. This report shall include a status update on the client's progress toward achieving the goals and objectives stated in the most current service plan.
4. The Contractor shall provide notification to the Department within seven calendar days of each client's admission and discharge.
5. A discharge plan shall be submitted at time of admission. A discharge summary must be submitted to the Head Injury Program within four weeks of discharge.

VIII. FEE SCHEDULE

1. The Department's approved Fee Schedule (Appendix C), which is attached, delineates the maximum allowable fee at which the Department will reimburse the Contractor.
2. The Department may prospectively amend or revise the Fee Schedule, in writing, by notifying the Contractor at least 30 calendar days in advance by first class U.S. mail of changes. Such changes are incorporated herein by reference as of their effective date(s), as indicated in the notice.

IX. PREVIOUS AGREEMENTS

As of the effective date of this Agreement, any other Agreement between the Contractor and the Department, whether written or oral, for services covered herein is terminated.

X. SUSPENSION OF CONTRACT SERVICES DUE TO UNAVAILABILITY OF FUNDS

1. The Department may, upon its determination that funds have or will become unavailable for any or all services provided under this Agreement, prospectively suspend provision of any or all of those services upon prior written notice to the Contractor by first class U.S. mail. This notification will instruct the Contractor that the services enumerated in the notice are to be suspended by the date set out in the notification. The Department will notify the Provider of the suspension of services as soon as practicable.
2. Department will not reimburse Contractor for suspended services under this Agreement unless and until the Department notifies the Provider in writing that the Department will do so.
3. All notifications sent out pursuant to this Section (X) become part of this Agreement and are incorporated herein by reference.

XI. MONITORING OF CONTRACTOR

1. The Contractor shall be subject to periodic on-site review by the Department or its designees, Commonwealth Auditor General, or the Inspector General.
2. Upon request, the Contractor shall submit to the Department such reports and records, including, but not limited to, client utilization, medical incident reports and client needs assessments.

XII. EXAMINATION OF RECORDS

1. The Contractor shall maintain all records, including, but not limited to, medical and financial records, pertaining to the services provided under this Agreement, and for which reimbursement is claimed, for a period of four years from the date of the final payment under this Agreement.
2. The Contractor shall make available at the office of the Contractor at reasonable times during the term of this Agreement, and four years thereafter, any of these records for inspection, audit or reproduction by any authorized representative of the Secretary of Health, the Auditor General, or the Inspector General.
3. The Contractor shall, upon request, furnish the Department with the itemized bills for all expenditures incurred in the performance of this Agreement and billed in a particular billing period (month). All expenditures must be documented. Documentation of expenditures shall include, but not be limited to, copies of vouchers, requisitions, invoices and receipts.
4. This Section supplements, but does not replace, Paragraphs 11 and 12 of the Standard General Terms and Conditions (Rev. 2/21), which are incorporated herein by reference.

XIII. TERMINATION PROVISIONS

1. Grounds for action. The Department may terminate a Provider's Agreement and seek reimbursement from that Provider if the Department determines that the Provider, owner of the Provider, or agent of the Provider has done any of the following:
 - a. Submitted false or fraudulent claims to the HIP;
 - b. Failed to comply with any term of this Agreement;
 - c. Been precluded or excluded, either voluntarily or involuntarily, as a Medical Assistance provider;
 - d. Been convicted of a Medicaid or Medicare related criminal offense;
 - e. Been convicted of a criminal offense under state or Federal laws relating to the services covered by this Agreement;
 - f. Been subject to license suspension or revocation following disciplinary action entered against the Provider or its health care providers providing services under this Agreement by a licensing or certifying authority;
 - g. Had a controlled drug license withdrawn or failed to report to the Department changes in the Provider's Drug Enforcement Agency Number;
 - h. Knowingly submitted a fraudulent or erroneous patient application or assisted a patient to do so;
 - i. Refusal to permit authorized state or Federal officials or their agents to examine the Provider's medical, fiscal or other records as necessary to verify claims made to the Department under this Agreement.

This section supplements but does not replace paragraph 27 of the Standard General Terms and Conditions, (Rev. 2/21), which are incorporated herein by reference.

2. The above is a non-exhaustive list which does not limit the Department's remedies for breach otherwise under this Agreement. Nor does this section prevent the Department from exercising any other right of termination the Department has under this Agreement or by law.

Name: _____ Clinic # _____ Date _____

Person reporting (circle one): Single Professional Professional Consensus Person with brain injury Significant other: _____

Below each item, circle the number that best describes the level at which the person being evaluated experiences problems. Mark the greatest level of problem that is appropriate. Problems that interfere rarely with daily or valued activities, that is, less than 5% of the time, should be considered not to interfere. Write comments about specific items at the end of the rating scale.

For Items 1-20, please use the rating scale below.

0 None	1 Mild problem but does <u>not</u> interfere with activities; may use assistive device or medication	2 Mild problem; interferes with activities 5-24% of the time	3 Moderate problem; interferes with activities 25-75% of the time	4 Severe problem; interferes with activities more than 75% of the time
---------------	---	---	--	---

Part A. Abilities

1. Mobility: Problems walking or moving; balance problems that interfere with moving about 0 1 2 3 4
2. Use of hands: Impaired strength or coordination in one or both hands 0 1 2 3 4
3. Vision: Problems seeing; double vision; eye, brain, or nerve injuries that interfere with seeing 0 1 2 3 4
4. *Audition: Problems hearing; ringing in the ears 0 1 2 3 4
5. Dizziness: Feeling unsteady, dizzy, light-headed 0 1 2 3 4
6. Motor speech: Abnormal clearness or rate of speech; stuttering 0 1 2 3 4
7A. Verbal communication: Problems expressing or understanding language 0 1 2 3 4
7B. Nonverbal communication: Restricted or unusual gestures or facial expressions; talking too much or not enough; missing nonverbal cues from others 0 1 2 3 4
8. Attention/Concentration: Problems ignoring distractions, shifting attention, keeping more than one thing in mind at a time 0 1 2 3 4
9. Memory: Problems learning and recalling new information 0 1 2 3 4
10. Fund of Information: Problems remembering information learned in school or on the job; difficulty remembering information about self and family from years ago 0 1 2 3 4
11. Novel problem-solving: Problems thinking up solutions or picking the best solution to new problems 0 1 2 3 4
12. Visuospatial abilities: Problems drawing, assembling things, route-finding, being visually aware on both the left and right sides 0 1 2 3 4

Part B. Adjustment

13. Anxiety: Tense, nervous, fearful, phobias, nightmares, flashbacks of stressful events 0 1 2 3 4
14. Depression: Sad, blue, hopeless, poor appetite, poor sleep, worry, self-criticism 0 1 2 3 4
15. Irritability, anger, aggression: Verbal or physical expressions of anger 0 1 2 3 4
16. *Pain and headache: Verbal and nonverbal expressions of pain; activities limited by pain 0 1 2 3 4
17. Fatigue: Feeling tired; lack of energy; tiring easily 0 1 2 3 4
18. Sensitivity to mild symptoms: Focusing on thinking, physical or emotional problems attributed to brain injury; rate only how concern or worry about these symptoms affects current functioning over and above the effects of the symptoms themselves 0 1 2 3 4
19. Inappropriate social interaction: Acting childish, silly, rude, behavior not fitting for time and place 0 1 2 3 4
20. Impaired self-awareness: Lack of recognition of personal limitations and disabilities and how they interfere with everyday activities and work or school 0 1 2 3 4
21. Family/significant relationships: Interactions with close others; describe stress within the family or those closest to the person with brain injury; “family functioning” means cooperating to accomplish those tasks that need to be done to keep the household running

Use scale at the bottom of the page to rate item #21

0 Normal stress within family or other close network of relationships	1 Mild stress that does <u>not</u> interfere with family functioning	2 Mild stress that interferes with family functioning 5-24% of the time	3 Moderate stress that interferes with family functioning 25-75% of the time	4 Severe stress that interferes with family functioning more than 75% of the time
--	---	--	---	--

Part C. Participation

22. Initiation: Problems getting started on activities without prompting

0 None	1 Mild problem but does <u>not</u> interfere with activities; may use assistive device or medication	2 Mild problem; interferes with activities 5-24% of the time	3 Moderate problem; interferes with activities 25-75% of the time	4 Severe problem; interferes with activities more than 75% of the time
--------	--	--	---	--

23. Social contact with friends, work associates, and other people who are not family, significant others, or professionals

0 Normal involvement with others	1 Mild difficulty in social situations but maintains normal involvement with others	2 Mildly limited involvement with others (75-95% of normal interaction for age)	3 Moderately limited involvement with others (25-74% of normal interaction for age)	4 No or rare involvement with others (less than 25% of normal interaction for age)
----------------------------------	---	---	---	--

24. Leisure and recreational activities

0 Normal participation in leisure activities for age	1 Mild difficulty in these activities but maintains normal participation	2 Mildly limited participation (75-95% of normal participation for age)	3 Moderately limited participation (25-74% of normal participation for age)	4 No or rare participation (less than 25% of normal participation for age)
--	--	---	---	--

25. Self-care: Eating, dressing, bathing, hygiene

0 Independent completion of self-care activities	1 Mild difficulty, occasional omissions or mildly slowed completion of self-care; may use assistive device or require occasional prompting	2 Requires a little assistance or supervision from others (5-24% of the time) including frequent prompting	3 Requires moderate assistance or supervision from others (25-75% of the time)	4 Requires extensive assistance or supervision from others (more than 75% of the time)
--	--	--	--	--

26. Residence: Responsibilities of independent living and homemaking (such as, meal preparation, home repairs and maintenance, personal health maintenance beyond basic hygiene including medication management) but not including managing money (see #29)

0 Independent; living without supervision or concern from others	1 Living without supervision but others have concerns about safety or managing responsibilities	2 Requires a little assistance or supervision from others (5-24% of the time)	3 Requires moderate assistance or supervision from others (25-75% of the time)	4 Requires extensive assistance or supervision from others (more than 75% of the time)
--	---	---	--	--

27. *Transportation

0 Independent in all modes of transportation including independent ability to operate a personal motor vehicle	1 Independent in all modes of transportation, but others have concerns about safety	2 Requires a little assistance or supervision from others (5-24% of the time); cannot drive	3 Requires moderate assistance or supervision from others (25-75% of the time); cannot drive	4 Requires extensive assistance or supervision from others (more than 75% of the time); cannot drive
--	---	---	--	--

28A. *Paid Employment: Rate either item 28A or 28B to reflect the primary desired social role. Do not rate both. Rate 28A if the primary social role is paid employment. If another social role is primary, rate only 28B. For both 28A and 28B, "support" means special help from another person with responsibilities (such as, a job coach or shadow, tutor, helper) or reduced responsibilities. Modifications to the physical environment that facilitate employment are not considered as support.

0 Full-time (more than 30 hrs/wk) without support	1 Part-time (3 to 30 hrs/wk) without support	2 Full-time or part-time with support	3 Sheltered work	4 Unemployed; employed less than 3 hours per week
---	--	---------------------------------------	------------------	---

28B. *Other employment: Involved in constructive, role-appropriate activity other than paid employment.

Check only one to indicate primary desired social role: Childrearing/care-giving Homemaker, no childrearing or caregiving Student Volunteer Retired (Check retired only if over age 60; if unemployed, retired as disabled and under age 60, indicate "Unemployed" for item 28A.)

0 Full-time (more than 30 hrs/wk) without support; full-time course load for students	1 Part-time (3 to 30 hrs/wk) without support	2 Full-time or part-time with support	3 Activities in a supervised environment other than a sheltered workshop	4 Inactive; involved in role-appropriate activities less than 3 hours per week
---	--	---------------------------------------	--	--

29. Managing money and finances: Shopping, keeping a check book or other bank account, managing personal income and investments; if independent with small purchases but not able to manage larger personal finances or investments, rate 3 or 4.

0 Independent, manages small purchases and personal finances without supervision or concern from others	1 Manages money independently but others have concerns about larger financial decisions	2 Requires a little help or supervision (5-24% of the time) with large finances; independent with small purchases	3 Requires moderate help or supervision (25-75% of the time) with large finances; some help with small purchases	4 Requires extensive help or supervision (more than 75% of the time) with large finances; frequent help with small purchases
---	---	---	--	--

Part D: Pre-existing and associated conditions. The items below do not contribute to the total score but are used to identify special needs and circumstances. For each rate, pre-injury and post-injury status.

30. Alcohol use: Use of alcoholic beverages.

Pre-injury _____ Post-injury _____					
0 No or socially acceptable use	1 Occasionally exceeds socially acceptable use but does not interfere with everyday functioning; current problem under treatment or in remission	2 Frequent excessive use that occasionally interferes with everyday functioning; possible dependence	3 Use or dependence interferes with everyday functioning; additional treatment recommended	4 Inpatient or residential treatment required	

31. Drug use: Use of illegal drugs or abuse of prescription drugs.

Pre-injury _____ Post-injury _____					
0 No or occasional use	1 Occasional use does not interfere with everyday functioning; current problem under treatment or in remission	2 Frequent use that occasionally interferes with everyday functioning; possible dependence	3 Use or dependence interferes with everyday functioning; additional treatment recommended	4 Inpatient or residential treatment required	

32. Psychotic Symptoms: Hallucinations, delusions, other persistent severely distorted perceptions of reality.

Pre-injury _____ Post-injury _____					
0 None	1 Current problem under treatment or in remission; symptoms do not interfere with everyday functioning	2 Symptoms occasionally interfere with everyday functioning, but no additional evaluation or treatment recommended	3 Symptoms interfere with everyday functioning; additional treatment recommended	4 Inpatient or residential treatment required	

33. Law violations: History before and after injury.

Pre-injury _____ Post-injury _____					
0 None or minor traffic violations only	1 Conviction on one or two misdemeanors other than minor traffic violations	2 History of more than two misdemeanors other than minor traffic violations	3 Single felony conviction	4 Repeat felony convictions	

34. Other condition causing physical impairment: Physical disability due to medical conditions other than brain injury, such as, spinal cord injury, amputation. Use scale below #35.

Pre-injury _____ Post-injury _____

35. Other condition causing cognitive impairment: Cognitive disability due to nonpsychiatric medical conditions other than brain injury, such as, dementia, stroke, developmental disability.

Pre-injury _____ Post-injury _____					
0 None	1 Mild problem but does <u>not</u> interfere with activities; may use assistive device or medication	2 Mild problem; interferes with activities 5-24% of the time	3 Moderate problem; interferes with activities 25-75% of the time	4 Severe problem; interferes with activities more than 75% of the time	

Comments:

Item #

Scoring Worksheet

Items with an asterisk (4, 16, 27, 28/28A) require rescoring as specified below before Raw Scores are summed and referred to Reference Tables to obtain Standard Scores. Because items 22-24 contribute to both the Adjustment Subscale and the Participation Subscale, the Total Score will be less than the sum of the three subscales.

Abilities Subscale

Rescore item 4. Original score = _____

If original score = 0, new score = 0

If original score = 1, 2, or 3, new score = 1

If original score = 4, new score = 3

A. New score for item 4 = _____

B. Sum of scores for items 1-3 and 5-12 = _____

(Use highest score for 7A or 7B)

Sum of A and B = Raw Score for Abilities subscale = _____ (place in Table below)

Adjustment Subscale

Rescore item 16. Original score = _____

If original score = 0, new score = 0

If original score = 1 or 2, new score = 1.

If original score = 3 or 4, new score = 2

C. New score for item 16 = _____

D. Sum of scores for items 13-15 and 17-24 = _____

Sum of C and D = Raw Score for Adjustment Subscale = _____ (place in Table below)

Participation Subscale

Rescore item 27. Original score = _____

If original score = 0 or 1, new score = 0

If original score = 2 or 3, new score = 1

If original score = 4, new score = 3

Rescore item 28A or 28B. Original score = _____

If original score = 0, new score = 0

If original score = 1 or 2, new score = 1

If original score = 3 or 4, new score = 3

E. New score for item 27 = _____

F. New score for item 28A or 28B = _____

G. Sum of scores for items 22-24 = _____ (place in Table below)

H. Sum of scores for items 25, 26, 29 = _____

Sum of E through H = Raw Score for Participation Subscale = _____ (place in Table below)

Use Reference Tables to Convert Raw Scores to Standard Scores

	Raw Scores (From worksheet above)	Standard (Obtain from appropriate reference Table)
I. Ability Subscale (Items 1-12)	_____	_____
II. Adjustment Subscale (Items 13-24)	_____	_____
III. Participation Subscale (Items 22-29)	_____	_____
IV. Subtotal of Subscale Raw Scores (I-III)	_____	
V. Sum of scores for items 22-24	_____	
VI. Subtract from V. from IV = Total Score	_____	_____

Head Injury Program – Client-Provider Agreement

Client:

Terms and Conditions for HIP Service Delivery: The applicant/client agrees to comply with the above rehabilitation service plan and with all terms and conditions for participation in the Head Injury Program as specified in the Head Injury Program application.

Specific Responsibilities of the Applicant Relative to Implementation of Each HIP Service: The applicant agrees to participate in the above services, as described in this Rehabilitation Service Plan, for the period of time recommended by the rehabilitation service provider. The applicant agrees to comply with the requirements for participation established by the rehabilitation service provider.

Financial Responsibility of the Applicant: The applicant/client has already certified in their Application for Services that the income, financial and all other information they have provided to the Department of Health is true, correct and complete to the best of their knowledge. The applicant/client agrees to pay the rehabilitation service provider, based upon their annual share of cost determined by the Department of Health.

Discharge Planning: Upon discharge from the rehabilitation provider, the applicant/client will be discharged to an appropriate provider should continued services be necessary and if funding is available or to the care or supervision of their family when funding is not available, or a suitable provider cannot be located.

I agree to the above terms and to participate in the Rehabilitation Service Plan as outlined above.

HIP Service Provider

Terms and Conditions for HIP Service Delivery: The rehabilitation service provider agrees to comply with all terms and conditions specified in their Participating Provider Agreement related to the delivery of services in this rehabilitation service plan.

Specific Responsibilities of the Rehabilitation Service Provider Relative to Implementation of Each HIP Service: The rehabilitation service provider agrees to provide the services identified above in the Rehabilitation Service Plan to the applicant/client as proposed. The rehabilitation service provider will perform, at a minimum, quarterly progress reviews to determine the client's progress in meeting the goals and objectives identified in the rehabilitation service plan. The results of the progress reviews will be conveyed to the client and his or her authorized representative.

Financial Responsibility of the Applicant, HIP and any Third Party: The Provider shall not bill enrolled patients, in part or in full, for any services listed on the Fee Schedule except where the Provider is so instructed, in writing, by the Department. Invoices submitted to the Department for enrolled patients who are expected to share in the cost of services will be rejected by the Department, in whole or in part, and the provider will be instructed, in writing, by the Department to bill the patient in whole or in part.

The Head Injury Program will reimburse the rehabilitation service provider, according to the approved fee schedule in the Participating Provider Agreement, after the provider bills the client when instructed by the Head Injury Program, the client's third-party insurance and all other state programs. The Head Injury Program is a payer of last resort according to the Participating Provider Agreement.

I agree to the above terms, to provide services as described above, to conduct progress reviews and to promote the applicant/client's achievement of his or her rehabilitation goals.

DEPARTMENT OF HEALTH

PAYMENT PROVISIONS

The Department agrees to pay the Contractor for services rendered pursuant to this Agreement as follows:

- A. Subject to the availability of State funds and the other terms and conditions of this Agreement, the Department will reimburse Contractor in accordance with the fee schedule, APPENDIX C.
- B. Payment to the Contractor made in accordance with the fee schedule set forth in APPENDIX C as follows:
 1. Payments will be made monthly upon submission of an itemized invoice for services rendered pursuant to this Agreement using the invoice format in Attachment 1 to this Appendix. The Department shall have the right to disapprove any expenditure made by the Contractor that is not in accordance with the terms of this Agreement and adjust any payment to the Contractor accordingly. The Department will reimburse only for those services which are listed on the Fee Schedule (Appendix C), and which are delivered by Contractors who have an Agreement with the Department for the provision of post-acute traumatic head injury rehabilitation services. The Contractor may sub-contract with another entity for the provision of services if prior written authorization is granted by the Department as stated in the Standard General Terms and Conditions (Rev. 2/21), which are incorporated herein by reference.
 2. The Contractor shall bill the Department at the current approved rate as indicated on the Fee Schedule, less any third party payment and the client's share. Reimbursement shall not exceed the amount indicated on the Fee Schedule, less third-party payments and payments from the client for his/her share.
 3. An original invoice (Attachment 1) and a detailed accounting (Attachment 2-4) itemized in accordance with the fee schedule shall be sent by the Contractor directly to Department of Health, Head Injury Program, 7th Floor East Wing, 625 Forster Street, Harrisburg, PA 17120. Invoices shall show SAP Vendor number, date when submitted, invoice number, name and address of the payee, billing period, total invoice amount, signature of person preparing the invoice, and date of signature.
 4. Unless otherwise specified elsewhere in this Agreement, the following shall apply: Contractor shall submit monthly invoices within 30 calendar days from the last day of the month within which the work is performed. The final invoice shall be submitted within 30 calendar days of this Agreement's termination date. The Department will neither honor nor be liable for invoices not submitted in compliance with the time requirements in this paragraph unless the Department agrees to an extension of these requirements in writing. Contractor shall be reimbursed only for services acceptable to the Department.

5. The Department, at its option, may withhold the last 20% of reimbursement due under this Agreement, until the Project Officer has determined that all work and services required under this Agreement have been performed or delivered in a manner acceptable to the Department.
6. The Department is the payer of last resort under this Agreement. The Contractor shall seek reimbursement from all other Federal and state programs for which the client may be eligible and, all third-party payers including, but not limited to, private insurers, before billing the Department. If the payment provided by another payer is, by law or agreement, accepted by the Contractor as payment in full (for example, Medicaid or Medicare or any other payer with whom the Contractor has such an agreement), the Contractor shall not bill the Department or client for services provided to the client.
7. The Contractor shall not bill eligible clients, in part or in full, for any services listed on the Fee Schedule except when the Contractor is so instructed in writing by the Department. If the Contractor submits invoices to the Department for clients who are expected to share in the cost of services, the Department will reject those invoices in whole or in part, and the Contractor will then be instructed in writing by the Department to bill the client in whole or in part accordingly.
8. The Department will reimburse Contractors for mileage according to the Commonwealth established rate for Transportation in accordance with the Commonwealth Travel and Subsistence Rates (Rev. 8/18), which are incorporated herein by reference. This mileage may be incurred in the course of traveling to/from a meeting with a client who may not be able to travel to the provider or in transporting a client to HIP-reimbursable rehabilitation services approved via the rehabilitation service plan.
9. The Department will not reimburse Contractors for lodging, parking, tolls, telephone calls, subsistence, copying, faxing, postage, or invoice preparation. Other non-reimbursable services include:

Intra-agency meetings (meetings that take place among staff of the same agency) such as staff meetings, case conference, internal progress/planning meetings.

Intake and clerical functions such as eligibility determination or routine, ongoing scheduling of appointments for other intra-agency staff.

Assigning or supervising direct service staff.

Missed appointments with the family/caretaker and client or the service provider(s).

Record keeping or medical documentation activities.

10. In the event a payment is received from another payer for a service that has been paid by the Department, a reimbursement check for the whole or part of the amount of the Department's payment, as appropriate, shall be made payable to the "Commonwealth of Pennsylvania – Head Injury Program" and mailed to the address to which invoices are to be sent, above. The name of the client, social security number, date of service, description of service, PPA number, and amount paid by the Department shall accompany each reimbursement check. Refunds to the Department as a result of overpayment or collection from another source of payment shall be refunded to the Department by the Contractor within 30 calendar days of the Contractor's receipt of excess payment.
11. The Commonwealth will make payments through the Automated Clearing House (ACH). Within 10 days of award of the Contract or Purchase Order, the Contractor must submit or must have already submitted its ACH information within its user profile in the Commonwealth's procurement system (SRM). Within 10 days of the Grant award, the Grantee must submit or must have already established its ACH information in the Commonwealth's Master Database. The Grantee will also be able to enroll to receive remittance information via electronic addenda and email (e-Remittance). ACH and e-Remittance information is available at <https://www.budget.pa.gov/Services/ForVendors/Pages/Direct-Deposit-and-e-Remittance.aspx>.
 - a. The Contractor must submit a unique invoice number with each invoice submitted. The unique invoice number will be listed on the Commonwealth of Pennsylvania's ACH remittance advice to enable the Contractor to properly apply the state agency's payment to the invoice submitted (for Contracts or Purchase Orders) or to the invoice or program (for Grant Agreements).
 - b. It is the responsibility of the Contractor to ensure that the ACH information contained in SRM (for Contracts or Purchase Orders) or in the Commonwealth's Master Database (for Grant Agreements) is accurate and complete. Failure to maintain accurate and complete information may result in delays in payments.
 - c. In the event this language conflicts with language contained elsewhere in this agreement, the language contained herein shall control.
12. The Department may prospectively amend or revise the head injury rehabilitation services invoice and the requirements stated herein, in writing, by notifying the Contractor at least 30 calendar days in advance by first class U.S. mail of such changes. Such changes are incorporated herein by reference as of their effective dates.
