## WalkWorks

WalkWorks — a collaboration of the Pennsylvania Department of Health, the University of Pittsburgh Graduate School of Public Health and community-based partners throughout the commonwealth — is increasing opportunities for physical activity.

WalkWorks aims to improve the health status of the population through:

- Development of walking routes that are accessible to individuals of all ages and abilities;
- Facilitation of walking groups to utilize the walking routes; and
- Promotion of policy development to enhance opportunities for active transportation.

The Pennsylvania State Health Improvement Plan 2015-2020 cites WalkWorks as an activity toward achieving its goal of decreasing the percentage of adults who engage in no leisure-time physical activity from 26 percent in 2013 to 23 percent by December 2020.

**A 15-minute mile burns as many calories as an 8.5-minute mile!**

## Fast facts about walking and fitness

- Walking is a fun, easy, free and accessible way to increase physical activity! Engaging in regular physical activity has many health benefits. It can help:
  - Control your weight;
  - Reduce your risk of cardiovascular disease, type 2 diabetes and some cancers;
  - Strengthen your bones and muscles;
  - Relieve stress and improve your mental health and mood; and
  - Increase your chances of living longer.
- The Centers for Disease Control and Prevention recommend that children and adolescents get at least 60 minutes of physical activity every day. It improves concentration, boosts moods and alertness, and enhances memory, creativity and overall learning.
- Adults need two hours of moderate-intensity aerobic activity (i.e., brisk walking) every week, according to the Centers for Disease Control and Prevention. That's about the length of a good movie.

## Get Walking!

Finding safe and accessible walking routes in your area is easy! With the help of community leaders across Pennsylvania, WalkWorks has identified routes and created maps that highlight historic landmarks or places of interest along the way. Visit [pawalkworks.com](http://pawalkworks.com) to see the locations of our 80 routes.

## Start Tracking!

Make your steps count!

WalkWorks offers you the opportunity to track your steps and convert other physical activity, such as biking and swimming, into steps via our easy-to-use online tracking program, Walker Tracker.

Sync your fitness device to record steps or manually enter your steps each day from your smart phone or personal computer to help achieve your goals!

Register on [pawalkworks.walkertracker.com](http://pawalkworks.walkertracker.com), today!

## Connect!

Join other walkers from across the commonwealth as you take steps towards a healthier you! Stay motivated by joining a walking team or a challenge, or by creating one of your own!
