SUMMARY

- Pennsylvania has seen an increase in new cases and stability in test positivity over the past week. Overall the cases in Pennsylvania are at moderate levels, however rising trends in Allegheny County are concerning.

- The following three counties had the highest number of new cases over the past 3 weeks: 1. Philadelphia County, 2. Allegheny County, and 3. Lancaster County. These counties represent 39.1 percent of new cases in Pennsylvania.

- Pennsylvania had 34 new cases per 100,000 population in the past week, compared to a national average of 100 per 100,000.

RECOMMENDATIONS

- Temporarily close bars, limit indoor dining, and require usage of cloth masks in all areas with increasing cases until cases significantly decline.

- In areas with increasing cases, conduct neighborhood testing and pooled testing in collaboration with community-led organizations. Test households in one tube with rapid turnaround testing. For households that test positive, isolate and conduct follow-up individual tests.

- Scale-up contact tracing.

- Conduct weekly testing in nursing homes with immediate action to protect vulnerable populations.

- Specific, detailed guidance on community mitigation measures can be found on the CDC website. https://www.cdc.gov/coronavirus/2019-ncov/
## CONFIRMED CASES
- **State, Last Week:** 4,371 (34)
- **% Change:** +21.1%
- **FEMA/HHS Region, Last Week:** 12,677 (41)
- **United States, Last Week:** 326,472 (100)

## DIAGNOSTIC TEST POSITIVITY RATE
- **State:** 4.6%
- **% Change:** +0.3%*
- **FEMA/HHS Region:** 5.8%
- **United States:** 8.3%

## TOTAL DIAGNOSTIC TESTS
- **State:** 119,120 (930)
- **% Change:** +3.3%
- **FEMA/HHS Region:** 326,500 (1,059)
- **United States:** 3,949,179 (1,207)

## CONFIRMED COVID DEATHS
- **State:** 167 (1)
- **% Change:** -7.2%
- **FEMA/HHS Region:** 413 (1)
- **United States:** 6,254 (2)

* Indicates absolute change in percentage points

### DATA SOURCES

**Cases and Deaths:** State values are calculated by aggregating county-level data from USAFacts; therefore, the values may not match those reported directly by the state. Data is through 7/3/2020; last week is 6/27 - 7/3, previous week is 6/20 - 6/26.

**Testing:** State-level values calculated by using 7-day rolling averages of reported tests. Regional- and national-level values calculated by using a combination of CELR (COVID-19 Electronic Lab Reporting) state health department-reported data and HHS Protect laboratory data (provided directly to Federal Government from public health labs, hospital labs, and commercial labs) through 7/1/2020. Last week is 6/25 - 7/1, previous week is 6/18 - 6/24.

**Mobility:** Descartes Labs. This data depicts the median distance moved across a collection of mobile devices to estimate the level of human mobility within a jurisdiction; 100% represents the baseline mobility level. Data is anonymized and provided at the county level. Data through 7/3/2020.

### DATA NOTES

- **Cases and deaths:** County-level data from USAFacts as of 12:45 EST on 07/05/2020. State values are calculated by aggregating county-level data from USAFacts; therefore, values may not match those reported directly by the state. Data are reviewed on a daily basis against internal and verified external sources and, if needed, adjusted. Last week data are from 6/27 to 7/3; previous week data are from 6/20 to 6/26.

- **Testing:** CELR (COVID-19 Electronic Lab Reporting) state health department-reported data are used to describe state-level totals when able to be disaggregated from serology test results and to describe county-level totals when information is available on patients’ county of residence or healthcare providers’ practice location. HHS Protect laboratory data (provided directly to Federal Government from public health labs, hospital labs, and commercial labs) are used otherwise. Some states did not report on certain days, which may affect the total number of tests resulted and positivity rate values. Total diagnostic tests are the number of tests performed, not the number of individuals tested. Diagnostic test positivity rate is the number of positive tests divided by the number of tests performed and resulted. Last week data are from 6/25 to 7/1; previous week data are from 6/18 to 6/24. CELR data is recent as of 23:00 EST on 07/03/2020; HHS Protect data as of 23:00 EST on 07/03/2020.

- **Mobility:** Descartes Labs. These data depict the median distance moved across a collection of mobile devices to estimate the level of human mobility within a jurisdiction; 100% represents the baseline mobility level. Data is recent as of 13:00 EST on 07/04/2020 and through 7/3/2020.

Governor and Senior Staff,

Thank you for your efforts in the whole-of-America approach to responding and
recovering while opening up American Again.

As a follow-up to yesterday’s briefing with the Vice President and the White House Coronavirus Task Force, attached you will find the state-level COVID-19 profile. The purpose of this report is to develop a shared understanding of the current status of the pandemic at the national, regional, state and local levels. We look forward to your feedback on this first iteration.

We recognize that data at the state level may differ from data available at the Federal level. We are looking to use consistent data sources and methods across jurisdictions. We look forward to your state’s continued support in identifying discrepancies and helping improve data completeness and sharing across systems.

If you have any questions about this information, please let us know.

**DATA SOURCES**

**Cases and Deaths:** State values are calculated by aggregating county-level data from USAFacts; therefore, the values may not match those reported directly by the state. Data is through 6/20/2020; last week is 6/14 – 6/20, previous week is 6/7 – 6/13.

**Testing:** CELR (COVID Electronic Lab Reporting) state health department-reported data and HHS Protect laboratory data (provided directly to Federal Government from public health labs, hospital labs, and commercial labs) through 6/17/2020. Last week is 6/11 – 6/17, previous week is 6/4 – 6/10.

**Mobility:** Descartes Labs. This data depicts the median distance moved across a collection of mobile devices to estimate the level of human mobility within a jurisdiction; 100% represents the baseline mobility level. Data through 6/19/2020.
**DATA SOURCES**

**Cases:** County-level data from USAFacts. State values are calculated by aggregating county-level data from USAFacts; therefore, the values may not match those reported directly by the state. Data is through 6/20/2020.

**Testing:** CELR (COVID Electronic Lab Reporting) state health department-reported data through 6/17/2020.
