

# PA Project Firstline Newsletter

Spring 2023

Volume 2, Number 3

## In This Issue

- Breaking News: Germs Threaten the Universe! Can you escape?
- NEW Spanish-Language Resources
- Request an In-Person or Virtual Training
- Project Firstline Partner Activities Update
- Interactive Offerings Spotlight

## Request a Training

Did you know that PA Project Firstline provides in-person or virtual training for healthcare facilities and all types of frontline healthcare workers?

To request training for your facility, we have a web form you can fill out to let us know what types of training and topics you are interested in for your staff. Check out our training request form [here](#).

Our list of topics is continually growing as new Project Firstline content is released. All education is designed to ensure that Frontline HCWs have the infection control knowledge they need to keep themselves, their patients, their colleagues, and their families safe.

## Breaking News: Germs Threaten the Universe! Can you escape?

The PA Project Firstline team is in desperate need of your help! Our beloved superhero, Captain Germ-B-Gone, is fighting the never-ending battle to protect our world from the devastating power of multiplying variants, but he can't do it alone! He needs you, the REAL heroes in this story, to help outwit his archenemy, Clutterbug, and stop his evil germ-spreading deeds right at the source.

***Do you have what it takes to unlock the clues without catching the flu? It's all up to you!***

Have you ever wanted to save the world, or at least pretend to? Well, now you can when you team up with PA Project Firstline through our newest educational offering. Participants can enhance their knowledge of infection prevention and control by using the escape room format to provide a supportive, safe, and dynamically engaging environment.

What is the Project Firstline escape room? It is a live, interactive training where teams of 5-6 people will work together for 30 minutes to navigate Clutterbug's clever traps and help unite with Captain Germ-B-Gone to proclaim victory. Four stations cover hand

## Project Firstline Partner Activities Update

The National Network of Public Health Institutes (NNPHI) has partnered with Project Firstline to create several interactive learning experiences. The topics include Cleaning and Disinfection, Contact Time, Ventilation, N95s and Testing the Seal, Personal Protective Equipment (PPE), What is a Virus? and How Do Viruses Spread. Each interactive experience is based on the content in Dr. Abby Carlson's Project Firstline videos. To check out these exciting new resources, click [here](#).

## Interactive Offerings Spotlight

Cleaning and disinfection are both important ways to keep infections from spreading in healthcare, but they are not the same! Scroll through this experience, created by the National Network of Public Health Institutes (NNPHI) in partnership with Project Firstline, to find out how appropriate cleaning and disinfection protects patients and staff. Click [here](#).

hygiene, source control, cleaning and disinfection, and personal protective equipment (PPE) and reinforce specific standard infection and control objectives throughout. Does your facility have what it takes to get out and stay out of the escape room? If you're interested in bringing this training to your facility, contact the PA Project Firstline team at [RA-DHFIRSTLINE@pa.gov](mailto:RA-DHFIRSTLINE@pa.gov).

## NEW Spanish-Language Resources

Project Firstline is excited to announce the launch of new content in Spanish. The new infection control educational materials and resources are based on the risk recognition content and were created for Spanish-speaking frontline healthcare workers. The Spanish section of the Project Firstline website has also been reorganized to allow for more straightforward navigation and accessibility of resources. Please join us in spreading the word about these new resources. Click on the picture and links below to link directly to the content.

- Identifique los riesgos de infecciones en la atención médica.
- Acceda a los materiales educativos sobre el control de infecciones.
- Control de infecciones y COVID-19.
